UVOD

Statistička izvješća Državnog zavoda za statistiku prikazuju najdetaljnije rezultate statističkih istraživanja iz istog područja.

Serijska publikacija Statistička izvješća nastavak je serije Dokumentacije, koja se do 1965. objavljivala povremeno, i to kao Bilteni, Publikacije i Saopćenja. Od 1965. objavljuje se redovito, a od 1997. nosi sadašnje ime.

Statističko izvješće s naslovom "Inputi sirovina i materijala u industrijsku proizvodnju u 2020. – detaljni godišnji rezultati" sadrži sveobuhvatne i najdetaljnije rezultate Godišnjeg istraživanja o utrošku sirovina, materijala i energenata u industriji (IND-21/REPRO) u 2020. Podaci o fizičkim količinama i vrijednostima utrošenih sirovina i materijala (inputi) za potrebe industrijske proizvodnje (outputa) u 2020. prikazani su na detaljnoj razini sirovina i materijala (ili usluga) iz Nomenklature sirovina i materijala industrije – NRMI-ja 2016. Svi prikazani podaci u ovoj publikaciji agregirani su na razinu Republike Hrvatske i razinu županija sumiranjem pojedinačnih podataka prikupljenih na razini lokalnih jedinica (ne poduzeća).

U prvom dijelu publikacija sadrži pregled za Republiku Hrvatsku – ukupno, najprije agregirani podaci o vrijednosti utroška sirovina i materijala industrije u 2020. na razini skupina djelatnosti NKD-a 2007. (tablica 1.), a zatim detaljni podaci o utrošenim sirovinama i materijalima (vlastito proizvedenima, domaćima i uvezenima) iz NRMI-ja 2016. za potrebe industrijske proizvodnje u 2020., svaka izražena u količinama i vrijednostima (tablica 2.).

Najvažnije utrošene sirovine i materijali za potrebe industrijske proizvodnje izabrane prema vrijednostima u 2020. prikazane su u tablici 3.

U drugom dijelu izvješća prikazan je pregled po županijama, najprije agregirani podaci o vrijednosti utroška sirovina i materijala industrije u 2020. (tablica 1.), a zatim detaljni podaci o utrošenim sirovinama i materijalima (vlastito proizvedenima, domaćima i uvezenima) iz NRMI-ja 2016. za potrebe industrijske proizvodnje u 2020., svaka izražena u količinama i vrijednostima (tablica 2.). Vrijednosti su agregirane na temelju djelatnosti u kojoj su se sirovine i materijali utrošili za potrebe industrijske proizvodnje u odgovarajućoj djelatnosti definiranoj na razini triju znamenki NKD-a 2007. Niže razine NKD-a 2007. zbog primjene načela tajnosti i zaštite pojedinačnih podataka nisu se mogle objaviti.

Posebno skrećemo pozornost korisnicima na to da se podaci o energentima industrije koji su prikupljeni istim istraživanjem IND-21/REPRO za 2020. objavljuju unutar posebne publikacije energije, odnosno Statističkom izvješću br. 1681 "Energetska statistika u 2020." Na kraju Statističkog izvješća nalazi se popis svih izdanih publikacija koje su objavljene iz područja statistike industrije i energije te se mogu naručiti ili koristiti u biblioteci Državnog zavoda za statistiku ili se nalaze na internetskim stranicama Državnog zavoda za statistiku.

INTRODUCTION

The Statistical Reports of the Croatian Bureau of Statistics present the most detailed results of statistical surveys in a particular field.

The series entitled the Statistical Reports is a continuation of the series under the heading Documentations, which was published periodically as Bulletins, Publications and Releases until 1965. Since 1965, it has been published regularly and, since 1997, it has been published under the present heading.

The Statistical Report, entitled the Inputs of Raw Materials in Industrial Production in 2020 – Detailed Annual Results, contains the most comprehensive and the most detailed results of the Annual Survey on Consumption of Raw Materials, Consumables and Energy in Industry (IND-21/REPRO form) in 2020. The data on the volume and value of consumed raw materials and consumables (inputs) for the purpose of industrial production (outputs) in 2020 are presented at the detailed level of raw materials and consumables (including services) of the Nomenclature of Raw Material Inputs of Industry – NRMI 2016. All data presented in this publication are aggregated at the Republic of Croatia level and at the county level by summing up individual data collected for industrial local units (not enterprises).

The first part of the publication contains a review for the Republic of Croatia – total, first aggregated data on values of consumed raw materials and consumables in 2020 (own-produced, domestic or/and non-domestic) at the 3-digit group level of the NKD 2007. (table 1.), then detailed data on the raw materials and consumables (own-produced, domestic or/and non-domestic) according to the NRMI 2016. consumed for industrial production purposes in 2020, each of them expressed in volumes and values (table 2.).

The most important raw materials and consumables consumed for the industrial production purposes and selected by value in 2020 are shown in table 3.

The second part of the publication contains a review by counties, first aggregated data on values of consumed raw materials and consumables in 2020 (table 1.) and then detailed data on consumed raw materials and consumables (own-produced, domestic or/and non-domestic) according to the NRMI 2016. consumed for industrial production purposes in 2020, each of them expressed in volumes and values (table 2.). Values were aggregated on the basis of the activity in which raw materials and consumables were consumed for production purposes, which is defined at the 3-digit level of the NKD 2007. For reasons of data confidentiality, lower levels of the NKD 2007. could not have been published.

Users should particularly pay attention to the fact that the data on energy in industry, collected by the IND-21/REPRO survey for 2020, are published within a special publication on energy, that is, the Statistical Report No. 1681 entitled Energy Statistics in 2020. At the end of the Statistical Report there is a list of all issued publications related to the industry and energy statistics, which are either available for purchase or reference in the library of the Croatian Bureau of Statistics or can be found on the web site of the Croatian Bureau of Statistics.

METODOLOŠKA OBJAŠNENJA

Ova publikacija sadrži detaljne rezultate Godišnjeg istraživanja o utrošku sirovina, materijala i energenata u industriji (IND-21/REPRO) za 2020. (u nastavku teksta: istraživanje REPRO za 2020). Rezultati su agregirani iz podataka prikupljenih na razini Nomenklature sirovina i materijala za industriju (NRMI 2016.), koja je sastavni dio Statističkih standarda za Godišnje istraživanje o utrošku sirovina, materijala i energenata u industriji (IND-21/REPRO) za 2020. Republike Hrvatske (NN, br. 60/09.). Pojam "industrija" definiran je četirima industrijskim područjima djelatnosti B, C, D i E (samo odjeljak 36) prema NKD-u 2007. (NN, br. 58/07. i 72/07.). Ta definicija industrije usklađena je s definicijom svih granskih istraživanja industrije Državnog zavoda za statistiku i s definicijom koja se upotrebljava za statistike industrije EU-a.

PРАВNA OSNOVA ISTRAŽIVANJA REPRO

Godišnje istraživanje REPRO za 2020. proveo je Državni zavod za statistiku na temelju Zakona o službenoj statistici (NN, br. 25/20.) i Programa statističkih aktivnosti Republike Hrvatske 2018. – 2020. (NN, br. 31/18.) prema spomenutim statističkim standardima. Obveza davanja podataka temelji se na članku 45. Zakona o službenoj statistici.

POKAZATELJI ISTRAŽIVANJA REPRO ZA 2020. O UTROŠKU SIROVINA I MATERIJALA ZA POTREBE INDUSTRIJSKE PROIZVODNJE (iz PRODCOM-a)

Prvi rezultati odnose se na najnovije podatke statistike potrošnje industrije, a izvedeni su iz godišnjih rezultata spomenutog istraživanja REPRO za 2020. Rezultati istraživanja REPRO osiguravaju detaljne informacije primarno za potrebe izrade tablica uporabe (input), stavljajući ih u odnos s rezultatima PRODCOM-a¹⁾ o prodanim industrijskim proizvodima (output) kako bi se omogućilo analiziranje robnih tokova u sklopu input-output koncepta na detaljnoj razini sirovina/proizvoda (nomenklature NRMI 2016./NIP 2020.).

Svi podaci koji su ovdje prikazani dobiveni su agregiranjem pojedinačnih podataka o utrošku sirovina i materijala iz NRMI-ja 2016., koji je sastavni dio spomenutih Statističkih standarda. No komentar glavnih rezultata istraživanja REPRO za 2020. (input) prikazan je u usporedbi s rezultatima istraživanja PRODCOM za 2020. (output) kako bi se naglasila svrha i cilj ovog istraživanja te osigurao zajednički okvir s istraživanjem PRODCOM za potrebe analiza input-output na harmoniziranoj osnovi (iz područja nacionalnih računa).

Iz navedenih razloga u tablici 1. i grafikonu 3. prikazani su glavni rezultati o vrijednostima utroška sirovina i materijala po djelatnostima potrošnje (razina industrijskih područja i odjeljaka NKD-a 2007.) za Republiku Hrvatsku u 2020. usporedno s glavnim rezultatima PRODCOM-a za 2020. o vrijednosti prodanih industrijskih proizvoda (output) generiranoj od istih jedinica. Sirovine i materijali, uključujući usluge, mogli su prema podrijetlu biti nabavljeni na tržištu (domaćemu ili stranome) od trećih osoba ili mogu biti intermedijarni proizvodi iz vlastite proizvodnje, a vrijednosno su iskazani po kupovnim cijenama. Regionalni pregled agregiranih podataka o vrijednosti utrošenih sirovina i materijala (uključujući usluge) za potrebe industrijske proizvodnje, također izražen u vrijednosti po kupovnim cijenama, prikazan je u tablici 1. i grafikonu 6. na razini županija.

1) Vidi komentar i metodološka objašnjenja u Priopćenju IND-2021-5-2 Proizvodnja i prodaja industrijskih proizvoda (PRODCOM) u 2020. – privremeni podaci, rujan 2021.

NOTES ON METHODOLOGY

This publication comprises detailed results of the Annual Survey on Raw Material and Energy Consumption in Industry (IND-21/REPRO form) in 2020 (hereinafter referred to as REPRO Survey for 2020). The results were aggregated from data collected at the level of the Nomenclature of Raw Materials and Consumables for Industry – NRMI 2016., which is an integral part of the Statistical Standards for the Annual Survey on Raw Material and Energy Consumption in Industry (IND-21/REPRO form) for 2020 in the Republic of Croatia (NN, No. 60/09). The term "industry" is defined by four industrial sections B, C, D and E (only division 36) according to the NKD 2007. (NN, Nos 58/07 and 72/02). This definition of industry is harmonised with the definition used in all branch industrial surveys within the Croatian Bureau of Statistics as well as with the definition used for industry statistics within the EU.

LEGAL BASIS OF REPRO SURVEY

The Annual REPRO Survey for 2020 was carried out by the Croatian Bureau of Statistics on the basis of the Official Statistics Act (NN, No.25/20) and the Programme of Statistical Activities of the Republic of Croatia 2018 – 2020 (NN, No. 31/18) according to the above-mentioned Statistical Standards. The obligation to provide data is based on Article 45 of the Official Statistics Act.

REPRO SURVEY INDICATORS ON CONSUMPTION OF RAW MATERIALS AND CONSUMABLES FOR INDUSTRIAL PRODUCTION PURPOSES (from PRODCOM), 2020

First results refer to the most recent data on the industrial consumption statistics and were derived from the annual results of the above mentioned REPRO Survey for 2020. REPRO results provide for detailed information primarily used in the compilation of use tables (inputs) by putting them in relation to PRODCOM results¹⁾ on industrial products sold (output) in order to enable the analysis of commodity flow, taking into account the input-output concepts at the detailed level of raw materials/products (nomenclatures NRMI 2016./NIP 2020.).

All data presented here were calculated by aggregation of individual data on consumed raw materials and consumables classified in the NRMI 2016., which is an integral part of the mentioned Statistical Standards. However, the commentary on main results of REPRO Survey for 2020 (inputs) was shown in the comparison with results of the PRODCOM Survey for 2020 (outputs) in order to emphasise the main purpose and aim of this Survey and to provide for a common framework with the PRODCOM Survey so to enable the input-output analysis on harmonised basis (in the scope of national accounts).

Therefore, table 1 and graph 3 show the main results on the value of consumed raw materials and consumables for industrial production purposes by usage of industrial sections (the NKD 2007. industrial sections and divisions level) for the total Republic of Croatia in 2020 parallel with the PRODCOM results for 2020 on the value of industrial products sold (output) generated by the same units. Concerning their origin, raw materials and consumables, including services, might be either purchased on markets (domestic or non-domestic) from third parties or might be own-produced intermediate products, but both were calculated in values of purchase prices. The regional review of aggregated data on the value of consumed raw materials and consumables, including services, for industrial production purposes, also expressed in purchase prices, was shown in table 1 and graph 6 at the county level.

1) See the commentary and Notes on Methodology in the First Release IND-2021-5-2 Production and Sale of Industrial Products (PRODCOM), 2020 – Provisional Data, September 2021.

USPOREDIVOST PODATAKA ISTRAŽIVANJA REPRO

Od 2000. do 2003. istovrsni su se podaci u naturalnom izrazu prikupljali unutar Tromjesečnog istraživanja o utrošku sirovina i materijala te finalnog utroška energenata u industriji (IND-1K), a prije toga unutar zajedničkoga Mjesečnog izvještaja industrije (IND-1) na temelju zajedničkih Metodoloških osnova za Mjesečni izvještaj industrije (IND-1), dio vezan za tablicu 2.²⁾ za oba istraživanja te na temelju prve verzije Nomenklature repromaterijala industrije (NRMI 1997.), koja je bila sastavni dio spomenute metodologije. Novim Statističkim standardima za istraživanje REPRO prikupljaju se podaci u godišnjoj dinamici, počevši od izvještajne godine 2004. na razini revidirane verzije NRMI 2008., na temelju koje se prikupljaju svi podaci o sirovinama i materijalima industrije. Sve tri nomenklature, NRMI 1997., NRMI 2004., NRMI 2008. i NRMI 2016. temelje se na strukturi istovrsne klasifikacije, verzijama KPD 1995., KPD 2002.³⁾, KPD 2008. i KPD 2015., za koje su izrađene korespondentne tablice veza. Stoga su podaci međusobno usporedivi na određenoj razini, u naturalnom izrazu (količinama), jer se u vrijednosnom izrazu prije nisu prikupljali.

OBUHVAAT I JEDINICE ISTRAŽIVANJA REPRO

Izvještajne jedinice istraživanja REPRO o utrošku sirovina i materijala industrije za 2020. jesu sva trgovačka društva, obrtnici i druge pravne osobe te njihovi dijelovi s više od 10 zaposlenika koji su utrošili sirovine i materijale za potrebe industrijske proizvodnje unutar industrijskih područja B, C, D i E (samo odjeljak 36) prema NKD-u 2007. u izvještajnome godišnjem razdoblju. Ciljane statističke jedinice jesu industrijska poduzeća i lokalne jedinice industrijskih i neindustrijskih poduzeća koji su utrošili sirovine i materijale definirane NRMI-jem 2016. za industrijsku proizvodnju već iskazanu u istraživanju PRODCOM za 2020. Spomenutim istraživanjima nisu obuhvaćene one statističke jedinice ili njihovi dijelovi koji su fizički izvan teritorija Republike Hrvatske. U profiliranju statističkih jedinica – industrijskih lokalnih jedinica – uzeto je u obzir načelo županije. U slučajevima kada promatrana jedinica djeluje na području nekoliko različitih županija, npr. u pet županija, jedinica je dodatno raščlanjena na pet lokalnih jedinica. Obuhvat istraživanja REPRO o utrošku sirovina, materijala i energenata industrije za 2020. (input) identičan je s obuhvatom istraživanja PRODCOM o industrijskoj proizvodnji za 2020. (output) za potrebe analize robnih tokova u okviru input-output koncepta na konzistentan i usporediv način. Stoga je obuhvat izvještajnih i statističkih jedinica određen adresarom statističkih jedinica industrije koji je izradio Odjel godišnjih poslovnih statistika i proizvođačkih cijena industrije te slijedi iste koncepte i kriterije obuhvata statističkih jedinica kao i adresar za istraživanje PRODCOM.

KONCEPTI I DEFINICIJE ISTRAŽIVANJA REPRO

Koncepti i definicije koji se primjenjuju u ovom istraživanju REPRO preuzeti su uglavnom iz ESA-e 2010⁴⁾ i drugih statističkih terminologija EU-a ili UN-a. Ti pojmovi osiguravaju dodatna objašnjenja koja služe za iskazivanje istraživanja REPRO i nemaju smisla definitivnih značenja tih riječi jer u drugim kontekstima mogu imati drugačije značenje. Namijenjeni su korisnicima rezultata istraživanja REPRO kako bi ih oni ispravno interpretirali.

- 2) Metodološke osnove za Mjesečni izvještaj industrije (IND-1) u dodatku sadržavaju NRMI 1997. Primjenjivale su se kao statistički standard Državnog zavoda za statistiku za Tromjesečno istraživanje o utrošku sirovina i materijala te finalnom utrošku energenata u industriji (NN, br. 18/97.).
- 3) KPD 2002. kratica je za Klasifikaciju proizvoda po djelatnostima RH (NN, br.128/03.).
- 4) Europski sustav nacionalnih računa 2010. (Uredba (EU) br. 549/2013. Europskog parlamenta i Vijeća od 21. svibnja 2013.) usklađen je sa SNA-om 2008. – Sustavom nacionalnih računa UN-a (ISBN 978-92-1-161522-7). U cijelom tekstu upotrebljava se kratica ESA 2010.

COMPARABILITY OF REPRO SURVEY DATA

In the period from 2000 to 2003, the same kind of data were collected in natural figures through the Quarterly Survey on Raw Materials and Consumables and Final Energy Consumption in Industry (IND-1K form), and before that through the joint Monthly Industrial Report (IND-1 form), both on the basis of the Methodology for Monthly Industrial Report on Industry (IND-1 form), a part related to table 2²⁾ for both above mentioned surveys as well as of the first version of the Nomenclature of Reproduction Materials of Industry (NRMI 1997.), which was an integral part of the above mentioned Methodology. The new Statistical Standards for the REPRO Survey are used for collection of data on annual basis, starting with 2004 as a reference year, on the basis of a revised version of the NRMI 2008., which is used for the collection of all data on individual raw materials and consumables in industry. Since both nomenclatures, NRMI 1997., NRMI 2004. and NRMI 2008., NRMI 2016. are based on the structure of the same reference classification, KPD 1995., KPD 2002.³⁾ and KPD 2008. KPD 2015. versions, correspondence tables were done in order to enable data comparability at a certain level, in natural figures (quantities), because earlier they were not collected in value terms.

COVERAGE AND UNITS OF REPRO SURVEY

Reporting units in the REPRO Survey on the Consumption of Raw Materials and Consumables in Industry in 2020 are all trade companies, tradesmen and other legal units and parts thereof employing 10 and more persons that consumed raw materials and consumables for industrial production purposes within the NKD 2007. industrial sections B, C, D and E (only division 36) in a referent annual period. Target statistical units are industrial enterprises and industrial local units of industrial and non-industrial enterprises that consumed raw materials and consumables, as defined in the NRMI 2016., for industrial production purposes, which has been already recorded in the PRODCOM Survey for 2020. Statistical units or parts thereof that are "physically" situated outside the territory of the Republic of Croatia were not covered by the mentioned Survey. In profiling of statistical units – industrial local units – the county principle was taken into account. In cases when observation units operates on the territory of different counties, e.g. in five counties, they are further divided into five local units. The coverage of the REPRO Survey on Raw Materials and Consumables and Energy Consumption in Industry for 2020 (inputs) is identical with the coverage of the PRODCOM Survey on industrial production for 2020 (outputs) in order to analyse the commodity flow in a consistent and comparable way, taking into account the input-output concepts. For that reason, the coverage of reporting and statistical units is defined in the Address Book of Industrial Statistical Units, which was established by the Department of Annual Business Statistics and Producer Prices of Industry, having the same scope, concept and criteria of coverage as the Address Book for the PRODCOM Survey.

CONCEPTS AND DEFINITIONS OF REPRO SURVEY

Concepts and definitions used in this REPRO Survey were taken over mostly from the ESA 2010⁴⁾ as well as from other EU or UN statistical terminology. They provide for a further description of some of the terms used in the presentation of the REPRO results, but they are not intended to provide definitive meanings of these words, for in other contexts they may have different meanings. They are intended for users of the REPRO results, in order to prevent the misinterpretation of data.

- 2) NRMI 1997. can be found in the Annex of the Notes on methodology in the Monthly Report on Industry (IND-1 form). It was also used as a statistical standard in the Croatian Bureau Statistics for the Quarterly Survey on Consumption of Raw Materials and Consumables as Final Consumption of Fuel in Industry (NN, No. 18/97).
- 3) The KPD 2002. is the acronym of the Classification of Products by Activities of the Republic of Croatia (NN, No. 128/03).
- 4) The European System of Accounts 2010 (Regulation (EU) No 549/2013 of the European Parliament and of the Council of 21 May 2013) is harmonised with the SNA 2008 – the UI System of National Accounts (ISBN 978-92-1-161522-7). The acronym ESA 2010 is used throughout the text.

NOMENKLATURA NRMI 2016.

NRMI 2016. sastavni je dio spomenutih statističkih standarda za istraživanje REPRO. Hijerarhijski strukturirana Nomenklatura sirovina i materijala uključujući usluge, verzija 2016., namijenjena je mjerenju godišnjeg utroška sirovina i materijala za potrebe industrijske proizvodnje u fizičkim mjernim jedinicama i vrijednosno. To je nacionalna detaljnija verzija KPD-a 2015. Verzija NRMI 2016., za razliku od NRMI-ja 1997., izrađena je posebno za utrošak u svakoj industrijskoj skupini djelatnosti (od 05.1 do 36.0) prema NKD-u 2007., stoga prve tri broježane oznake označuju industrijsku skupinu djelatnosti u kojoj se uobičajeno troši određena vrsta sirovina i materijala (uključujući industrijske usluge). Sljedećih šest brojčanih oznaka u šifri označuju sirovine i materijale NRMI-ja 2016., a to je zapravo stavka KPD-a 2015. Verzija NRMI 2016. izrađena je na temelju verzije KPD 2015., a usklađena je na razini sirovina/proizvoda s Kombiniranom nomenklaturom 2020. (CN) EU-a i s Carinskom tarifom Republike Hrvatske za 2020.⁵⁾ preko korespondentnih tablica veza. Šifra sirovina i materijala iz NRMI-ja 2016. sastoji se od upisanih deset brojčanih oznaka, ali se za svaku pojedinačno iskazanu sirovinu i materijal iz NRMI-ja 2016. treba upisati jedanaesta brojčana oznaka koja upućuje na podrijetlo sirovine (vlastito, domaće ili strano) te je ispunjava izvještajna jedinica upisom u obrazac IND-21/REPRO. Sadašnja verzija NRMI 2016. usklađena je s novim klasifikacijskim sustavom. Raščlamba sirovina i materijala u NRMI-ju 2016. koje troši neka industrija za proizvodnju industrijskih proizvoda na razini skupina djelatnosti NKD-a 2007. zadana je okvirom KPD-a 2015., a uglavnom pokriva sirovine proizvodnih područja KPD-a 2015. od A do E. U iznimnim slučajevima stavke KPD-a 2015. dodatno su raščlanjene ako je bila riječ o sirovinama i materijalima koji su važni za određenu proizvodnju, a nisu prepoznatljivi unutar potkategorije proizvoda KPD-a 2015. Ukupno ima oko 7 800 šifara sirovina i materijala s pridruženom mjernom jedinicom u kojoj treba iskazati podatke o godišnjem utrošku sirovina i materijala.

SIROVINE I MATERIJALI

Prema konceptu istraživanja REPRO, pojam sirovina i materijala definiran je prošireno i odnosi se na sva dobra koja imaju fizičku dimenziju ili industrijske usluge koje se pod posebnom šifrom i nazivom nalaze u NRMI-ju 2016., pod uvjetom da se koriste kao inputi u industrijsku proizvodnju izvještajnih jedinica, gdje se mogu transformirati ili potpuno utrošiti u procesu proizvodnje. NRMI 2016. sadrži detaljne sirovine i materijale koji uključuju energente namijenjene transformaciji energije ili neenergetskoj potrošnji (isključujući one namijenjene finalnoj energetske potrošnji industrije), rezervne dijelove, sitni inventar, ambalažu, gume za vozila i drugi materijal za potrošnju prema svakoj industrijskoj skupini djelatnosti NKD-a 2007. (od 05.1 do 36.0).

POTROŠNJA SIROVINA I MATERIJALA U INDUSTRIJI

Potrošnja sirovina i materijala u industriji pokriva sve sirovine i materijale statističke jedinice nabavljene i utrošene u proizvodnom procesu za proizvodnju proizvoda u sektoru industrije. Bilježe se sirovine i materijali koji su vlastito proizvedeni (intermedijarni proizvodi izvještajne jedinice) ili nabavljeni na domaćem i stranom tržištu (iz uvoza) te utrošeni za industrijsku proizvodnju u istome izvještajnom razdoblju.

5) Carinska tarifa Republike Hrvatske (NN, br. 124/15.), verzija CT 2020., usklađena je s verzijom CN 2020 EU-a do osmeroznamenkaste brojčane oznake.

NRMI 2016. NOMENCLATURE

The NRMI 2016. is an integral part of the above-mentioned Statistical Standards for the REPRO Survey. The hierarchically structured Nomenclature of Raw Materials and Consumables, including Services, 2016 version, was created for measuring the annual consumption of raw materials and consumables for industrial production purposes in volume and value terms. It represents the national, more detailed version of the KPD 2015. The NRMI 2016. version, as opposed to the NRMI 1997 version, was specially made to be used in monitoring the consumption in each of the NKD 2007. industrial activity groups separately (05.1 to 36.0). Therefore, the first tree digits indicate an industrial group of activity in which certain raw materials or consumables are usually used (including industrial services), while the following six digits indicate a particular code of individual raw materials or consumables classified in the NRMI 2016., but it is, in fact, a KPD 2015. item, because the NRMI 2016. version is based on the KPD 2015. version and harmonised up to the level of raw materials/products with the EU Combined Nomenclature 2020 (CN) as well as with the Customs Tariff of the Republic of Croatia for 2020⁵⁾ via correspondence tables. The NRMI 2016. code of raw materials and consumables consists of 10 digits, but providing that for individual raw material or consumable classified in the NRMI 2016., reporting units, while filling in the IND-21/REPRO form, are obliged to add the eleventh digit to this code, which indicates its origin (own produced, domestic or non-domestic). The current version of the NRMI 2016. is harmonised with the new classification system. The breakdown of raw materials and consumables classified in the NRMI 2016., which are consumed by industries for the industrial production purposes at the NKD 2007. activity group level, is defined with the KPD 2015. and mostly covers raw materials and consumables classified in the KPD 2015. production sections A to E. In exceptional cases, the KPD 2015. items are further divided if particular raw materials and consumables seemed to be very important for a specific production, but were not recognisable at the sub-category level of the KPD 2015. products. The NRMI 2016. comprises about 7 800 codes of raw materials and consumables, together with assigned measurement units used in expressing data on the annual consumption of raw materials and consumables.

RAW MATERIALS AND CONSUMABLES

According to the concept of the REPRO Survey, the term "raw materials and consumables" is defined in a wider context and refers to all goods with physical dimension as well as to industrial services that can be found in the NRMI 2016. under a separate code, providing that they are used as inputs in the production process of reporting units, where they may either be transformed or used up in the production process. The NRMI 2016. comprises detailed raw materials and consumables, which includes energy for transformation purposes or non-energy consumption (excluding those used for final energy consumption in industry), spare parts, small tools, containers, tubes and tires for vehicles and other consumables to be consumed by each NKD 2007. industrial activity group (05.1 – 36.0).

CONSUMPTION OF RAW MATERIALS BY INDUSTRIES

It covers the consumption of raw materials and consumables purchased and consumed by industrial statistical units in their production process in the industry sector. It also covers the consumption of own-produced raw materials and consumables (intermediate products of a reporting unit) as well as those purchased by industrial statistical units on domestic or non-domestic market (imports) and consumed in their production process in an annual reference period.

5) The Customs Tariff of the Republic of Croatia (NN, No. 124/15), the CT 2020 version, is harmonised with the CN 2020 EU version up to the eight-digit figure.

U istraživanju REPRO svaka pojedinačno utrošena sirovina i materijal prema NRMI-ju 2016. bilježi se u količinama (za upotrijebljenu mjernu jedinicu) i vrijednosno u tisućama kuna. Vrednuje se po tekućim kupovnim cijenama istovrsnih sirovina i materijala u vrijeme kada ulaze u proizvodni proces, tj. kada se troše, a ne kada su nabavljeni/kupljeni i stavljeni u skladište (na zalihe). Potrošnja sirovina i materijala industrije usklađena je s definicijama ESA-e 2010 u dijelu koji se odnosi na intermedijarnu potrošnju.⁶⁾ Ne uključuje potrošnju fiksne aktive (zgrade, strojevi, oprema, zemljišta), čija se potrošnja bilježi kao potrošnja fiksnoga kapitala.

KUPOVNE CIJENE

U vrijeme nabave kupovna cijena jest cijena koju kupac stvarno plaća za proizvode, a uključuje sve poreze i pristojbe osim PDV-a i ostalih odbitnih poreza na proizvode (npr. trošarine) te subvencija na proizvode. U kupovnu cijenu treba uključiti i bilo koji trošak prijevoza koji kupac plaća odvojeno na mjestu isporuke, a treba odbiti cjelokupni popust na količinu ili kupnju izvan sezone i kamatu ili naplaćenu uslugu u kreditnim aranžmanima ili neke naplate kao rezultat neplaćanja u roku. U istraživanju REPRO vrijednost potrošenih sirovina i materijala industrija bilježi se po tekućim kupovnim cijenama istovrsnih sirovina i materijala u vrijeme kada ulaze u proizvodni proces (kada se troše), a ne kada su kupljeni (nabavljeni) i stavljeni na skladište (zalihe), a usklađena je s konceptom ESA-e 2010.

PRODCOM PROIZVOD

Proizvod je posljedica neke industrijske djelatnosti. Koristi se kao opći naziv za proizvode koji imaju fizičku dimenziju te za industrijske usluge. Definiran je Nomenklaturom industrijskih proizvoda – NIP – i sastavni je dio istraživanja PRODCOM o industrijskoj proizvodnji RH. Istraživanje REPRO za 2020. povezano je s proizvodnjom industrijskih proizvoda definiranih verzijom NIP-a 2020., dok će se za sljedeća istraživanja REPRO za 2020. nadalje upotrebljavati revidirane verzije NIP-a za svaku sljedeću izvještajnu godinu. Uz to što će se objavljivati u Narodnim novinama početkom svake sljedeće godine, bit će dostupne i na internetskim stranicama Državnog zavoda za statistiku.

VRIJEDNOST PRODANE PRODCOM PROIZVODNJE

Obračunava se na temelju prodajne cijene koju je ostvario ili će ostvariti proizvođač u izvještajnom razdoblju (fakturirane vrijednosti). U vrijednost prodaje uključeni su i troškovi pakiranja kada su obračunani (naplaćeni) posebno, a isključeni su sljedeći izdaci: bilo koji obračun poreza na promet i potrošnju (PDV i trošarine), troškovi otpreme kada su obračunani posebno ili bilo koji popusti potrošačima. Za proizvode koji su dani u zakup ili na leasing trećim osobama određene su cijene koje su se za njih mogle postići na tržištu kao procijenjene vrijednosti.

INPUT-OUTPUT TABLICE

Input-output tablice jesu način prezentacije detaljne analize procesa proizvodnje i potrošnje dobara i usluga (proizvoda) te prihoda ostvarenoga u toj proizvodnji. Mogu imati oblik tablica ponude i uporabe ili simetričnih input-output tablica. Pojam je definiran u kontekstu ESA-e 2010.

6) Usklađeno s definicijom "Intermediate consumption" iz ESA-e 2010 (3.69). Za kraticu ESA 2010 vidi objašnjenje u bilješci 4.

In the REPRO Survey, the consumption of each raw material and consumable classified in the NRMI 2016, is recorded in volume (using a defined measurement unit) and in values in thousands of kuna. It has to be recorded in purchaser prices obtainable for the same kind of goods or services at the moment they are actually entering the production process, that is, when they are consumed, and not when they are purchased and put on stock (inventories). The consumption of raw materials and consumables is harmonised with the definition from the European System of Accounts (ESA 2010), in the part referring to the intermediate consumption⁶⁾. This definition excludes the consumption of fixed assets (buildings, machinery, equipment, land) which is recorded as the consumption of fixed capital

PURCHASE PRICES

At the time of purchase, a purchase price is a price a purchaser actually pays for products. It includes taxes and charges on products, but excluding VAT and other deductible taxes (e.g., excises) and subsidies. It also includes any transport charges paid separately by the purchaser at a place of delivery and excludes any discount for bulk or off-peak purchase as well as interest or services charges added under credit arrangements or any charge paid as a result of failing to pay within a stated period of time. In the REPRO Survey, the value of raw materials and consumables consumed by industries has to be recorded in current purchase prices obtainable for the same kind of goods or services at the moment when they actually enter the production process, that is, when they are consumed, and not when they were purchased and put on stock (inventories). It is in line with the ESA 2010 concept.

PRODCOM PRODUCT

Product is an outcome of a certain economic activity. It is a generic term applied to products that have a physical dimension as well as for industrial services. It is defined by the headings of the Nomenclature of Industrial Products – NIP and it is an integral part of the PRODCOM Survey on Industrial Production of the Republic of Croatia. The REPRO Survey for 2020 corresponds to the industrial production defined by the 2020 version of NIP, while for annual REPRO surveys for 2020 and further on it will be necessary to use revised NIP versions for every subsequent reporting year. Besides their publication in Narodne novine (NN) at the beginning of each subsequent year, these versions will be available on the internet site of the Croatian Bureau of Statistics.

VALUE OF PRODCOM PRODUCTS SOLD

It is calculated on the basis of the selling price obtained/obtainable during the reporting period (invoiced values). The value of production includes packaging costs, even if they are charged separately, but the following costs are not included: any turnover and consumer tax charged (VAT and excises), separately charged freight costs, any discount granted to customers. If finished products are hired out or leased to third parties, the price obtainable on the market for the product in question is recorded as an estimated value.

INPUT-OUTPUT TABLES

Input-output tables are means of presenting a detailed analysis of the process of production and the use of goods and services (products) and the income generated in that production. They can be designed in the form of either supply and use tables or symmetric input-output tables. The term is defined within the ESA 2010 concept.

6) Harmonised with the definition of the intermediate consumption taken over from the ESA 2010 (3.69). Explanation for the acronym ESA 2010 can be found in footnote 4.

PODACI IZ TABLIČNIH PREGLEDA

PRVI DIO – PREGLED ZA REPUBLIKU HRVATSKU

Pregled detaljnih podataka o ukupnoj vrijednosti utroška sirovina i materijala za Republiku Hrvatsku prikazan je u tablicama od 1. do 3. Kako bi se korisnici ispravno koristili podacima, dajemo kratka metodološka objašnjenja za tablice prema redosljedu njihova prikazivanja.

TABLICA 1. VRIJEDNOST UTROŠKA SIROVINA I MATERIJALA U 2019. I 2020. PO INDUSTRIJAMA POTROŠNJE – AGREGATI ZA INDUSTRIJSKE SKUPINE DJELATNOSTI NKD-a 2007.

U toj tablici prikazuje se ukupna vrijednost utroška sirovina i materijala u 2020. agregirana prema NRMI-ju 2016. po područjima, odjeljcima i skupinama NKD-a 2007. u kojima su se pojedine sirovine i materijali iz NRMI-ja 2016. utrošili za potrebe industrijske proizvodnje koje su izvještajne jedinice iskazale u istraživanju PRODCOM za 2020. za industrijske lokalne jedinice.

Utrošak sirovina i materijala agregiran iz podataka NRMI-ja 2016. ovdje je prikazan za ukupnu vrijednost i raščlanjen prema podrijetlu sirovine i materijala: iz vlastite proizvodnje, s domaćeg tržišta i s inozemnog tržišta.

TABLICA 2. VRIJEDNOST UTROŠKA SIROVINA I MATERIJALA U 2019. I 2020. PO INDUSTRIJAMA POTROŠNJE I PREMA PODRIJETLU SIROVINA – DETALJNA RAZINA NRMI-ja 2016.

U toj tablici prikazuju se utrošene sirovine i materijali podrijetlom iz vlastite proizvodnje (šifra "1" u stupcu "Podrijetlo"), ako su nabavljene na domaćem tržištu (šifra "8" u stupcu "Podrijetlo") i ako su nabavljene na inozemnom tržištu (šifra "9" u stupcu "Podrijetlo"). Posebno napominjemo korisnicima, kako pri korištenju ne bi došlo do dvostrukosti, da je za svaku utrošenu pojedinačnu šifru proizvoda generirana jedna nova šifra za ukupno (sva podrijetla zajedno ako ih ima više) te pri korištenju podataka treba uzeti šifru za ukupno s oznakom "0" u stupcu "Podrijetlo" ili pojedinačne šifre podrijetla (1, 8 ili 9 u stupcu "Podrijetlo").

Broj lokalnih jedinica može biti jednak ili veći od broja izvještajnih jedinica/poduzeća jer izvještajna jedinica/ poduzeće može imati jednu ili više lokalnih jedinica s obzirom na to obavlja li izvještajna jedinica/poduzeće neku industrijsku djelatnost u jednoj ili više županija.

Ako je broj izvještajnih jedinica/poduzeća ili broj lokalnih jedinica manji od 3, iskazan je oznakom "z" (zaštićeni podatak) radi poštivanja načela zaštite pojedinačnih podataka.

Prosječna vrijednost utrošenih sirovina i materijala izvedeni je pokazatelj i izražena je u kunama. Obračunava se jednostavnim računom, tako da se ukupna vrijednost utrošenih pojedinačnih sirovina i materijala podijeli s količinom istih utrošenih sirovina i materijala te pomnoži s 1 000 jer se podatak ovdje iskazuje u kunama. To je njihova jedinična vrijednost, a ne prosječna cijena.

TABLICA 3. NAJVAŽNIJE UTROŠENE SIROVINE I MATERIJALI ZA POTREBE INDUSTRIJSKE PROIZVODNJE IZABRANE PREMA VRIJEDNOSTI U 2020.

U toj tablici prikazuju se utrošene sirovine i materijali podrijetlom iz vlastite proizvodnje, domaćega i inozemnog tržišta koje su najvažnije za utrošak u PRODCOM-u 2020.

DATA PRESENTED IN TABLES

PART ONE – REVIEW OF REPUBLIC OF CROATIA

The review of detailed data on the total value of consumed raw materials and consumables for the Republic of Croatia – total is given in tables 1 – 3. In order to ensure the correct use of the presented data, there are brief methodological explanations for the tables by the order of their presentation.

TABLE 1. TOTAL VALUE OF CONSUMED RAW MATERIALS AND CONSUMABLES, BY INDUSTRIES OF USAGE – AGGREGATES FOR NKD 2007. INDUSTRIAL ACTIVITY GROUPS, 2019 AND 2020

This table presents data on the value of consumed raw materials and consumables in 2020 aggregated according to the NRMI 2016. by the NKD 2007. sections, divisions and groups, in which individual raw materials and consumables of the NRMI 2016. were used for industrial production purposes, which reporting units expressed in the PRODCOM Survey for 2020 for industrial local units.

Data on the consumption of raw materials and consumables aggregated according to the NRMI 2016. is shown here for the total value as well as for values broken down by the origin of a raw material: own-production, from domestic markets or from non-domestic markets.

TABLE 2. VALUE OF CONSUMED RAW MATERIALS AND CONSUMABLES, BY INDUSTRIES OF USAGE AND ORIGIN – DETAILED NRMI 2016. LEVELS, 2019 AND 2020

This table presents consumed raw materials and consumables originating from own production (code "1" in the column "Origin"), from purchase on domestic market (code "8" in the column "Origin") or from purchase on non-domestic market (code "9" in the column "Origin"). In order to avoid duplicity in the interpretation of data, users should keep in mind that a new code for "total" (that is, for all origins if there are more than one) has been generated for every used individual product code, so it is possible to use either a code for "total" marked with "0" in the column "Origin" or individual codes for origin (1, 8 or 9 in the column "Origin").

The number of local units may be the same or larger than the number of enterprises, since one enterprise may have one or more local units, depending on whether it carries out a certain industrial activity in one or more counties.

For the protection of individual information, if a number of reporting units/enterprises or a number of local units is smaller than 3, it is marked with "z" (protected data).

The average value of consumed raw materials is a derived indicator and is expressed in kuna. It is calculated by using a simple formula, by dividing the total value of consumed individual raw materials by the total consumed volumes of the same raw materials and then multiply them by 1000 to get values in kuna. It represents a unit value rather than their average price.

TABLE 3. MOST IMPORTANT RAW MATERIALS AND CONSUMABLES CONSUMED FOR INDUSTRIAL PRODUCTION PURPOSE SELECTED BY VALUE, 2020

This table presents consumed raw materials and consumables originating from own production, domestic and non-domestic market, which are, regarding the PRODCOM 2020, the most important for consumption

DRUGI DIO – PREGLED PO ŽUPANIJAMA

Pregled po županijama sadrži agregirane podatke o utrošku sirovina i materijala za industrijsku proizvodnju prema teritorijalnom ustroju sa stanjem 31. prosinca 2020. (Zakon o područjima županija, gradova i općina u Republici Hrvatskoj; NN, br. 86/06., 125/06., 16/07., 95/08., 46/10., 145/10., 37/13., 44/13., 45/13. i 110/15.).

TABLICA 1. VRIJEDNOST UTROŠKA SIROVINA I MATERIJALA U 2019. I 2020. ZA POTREBE INDUSTRIJSKE PROIZVODNJE PREMA POTROŠNJI NKD-a 2007., PODRIJETLU I PO ŽUPANIJAMA

Ovdje se daje pregled sirovina i materijala utrošenih za potrebe industrijske proizvodnje PRODCOM-a u 2019. i 2020., i to po županijama i prema podrijetlu.

TABLICA 2. VRIJEDNOST UTROŠKA SIROVINA I MATERIJALA U 2019. I 2020. PO INDUSTRIJAMA POTROŠNJE U INDUSTRIJSKIM PODRUČJIMA NKD-a 2007., PREMA PODRIJETLU I PO ŽUPANIJAMA

U toj tablici prikazuje se detaljan pregled sirovina i materijala prema NRMI-ju 2016. koje su utrošile industrijske lokalne jedinice za potrebe industrijske proizvodnje (iz PRODCOM-a) u 2019. i 2020. prikazan za svaku županiju posebno, jednako kao i u pregledu za Republiku Hrvatsku. Utrošak sirovina i materijala za svaku pojedinačnu sirovinu iz NRMI-ja 2016. ovdje je prikazan ukupno i raščlanjeno po područjima i podrijetlu sirovina i materijala (količine i vrijednosti) iz vlastite proizvodnje s domaćega i inozemnog tržišta.

Ako je broj izvještajnih jedinica ili broj industrijskih lokalnih jedinica manji od 3, iskazan je oznakom "z" (zaštićeni podatak) radi poštivanja načela zaštite pojedinačnih podataka.

PART TWO – REVIEW BY COUNTIES

The Review by Counties contains aggregated data on the consumption of raw materials and consumables for industrial production purposes according to the territorial constitution with the situation as on 31 December 2020 (the Act on Territories of Counties, Towns and Municipalities in the Republic of Croatia; NN, Nos 86/06, 125/06, 16/07, 95/08, 46/10, 145/10, 37/13, 44/13, 45/13 and 110/15).

TABLE 1. VALUE OF CONSUMED RAW MATERIALS AND CONSUMABLES FOR INDUSTRIAL PRODUCTION PURPOSES, ACCORDING TO INDUSTRIES OF USAGE IN INDUSTRIAL NKD 2007. SECTIONS AND DIVISIONS, BY ORIGIN AND BY COUNTIES, 2019 AND 2020

The table presents review of raw materials and consumables consumed for PRODCOM industrial production purposes in 2019 and 2020, by counties and by origin.

TABLE 2. VALUE OF CONSUMED RAW MATERIALS AND CONSUMABLES, BY INDUSTRIES OF USAGE IN INDUSTRIAL NKD 2007. SECTIONS, BY ORIGIN AND BY COUNTIES, 2019 AND 2020

This table presents a detailed review of raw materials and consumables according to the NRMI 2016. that local units consumed for (PRODCOM) industrial production purposes in 2019 and 2020. This is shown separately for each county in the same way as in the Review of the Republic of Croatia. Data on the consumption of individual raw materials and consumables aggregated according to the NRMI 2016. is shown here for the total value as well as for values broken down by sections and the origin of raw materials and consumables (quantities and values) from own-production, from domestic markets or from non-domestic markets.

For the protection of individual information, if the number of reporting units/enterprises or the number of local units is smaller than 3, it is marked with "z" (protected data).

KOMENTAR

U 2020. ukupna vrijednost utroška sirovina i materijala za industrijsku proizvodnju od poduzeća koja su se bavila industrijskom proizvodnjom u Republici Hrvatskoj iznosila je 47 683 milijuna kuna prema obuhvatu Godišnjeg izvještaja o utrošku sirovina, materijala i energenata industrije za 2020. U usporedbi s ukupnom vrijednosti prodaje industrijskih proizvoda (outputa), prema rezultatima istraživanja PRODCOM o industrijskoj proizvodnji za 2020.⁷⁾, od ukupno 129 186 milijuna kuna koje su ostvarila ista poduzeća, vrijednost inputa sirovina i materijala utrošenih za spomenutu industrijsku proizvodnju sudjeluje s 36,9% u vrijednosti outputa industrije. Drugim riječima, ukupna vrijednost prodaje industrijskih proizvoda koju su ostvarila poduzeća u 2020. veća je za 81 503 milijuna kuna (63,1%) od izdataka za utrošene sirovine i materijale u industrijskom procesu za proizvodnju tih proizvoda, prema gruboj bilanci inputa – outputa (grafikon G-1.).

Vrijednost utrošenih sirovina i materijala kao inputa u industrijsku proizvodnju u 2020. prema potrošnji industrijskih područja NKD-a 2007. najveća je u području C Prerađivačka industrija i iznosi 45 069 milijuna kuna, u području D Opskrba električnom energijom, plinom, parom i klimatizacija iznosi 2 400 milijuna kuna, u području B Rudarstvo i vađenje 206 milijuna kuna, dok je najmanja u području E Opskrba vodom; uklanjanje otpadnih voda, gospodaranje otpadom te djelatnosti sanacije okoliša (samo odjeljak 36) i iznosi 8 milijuna kuna. Ako usporedimo potrošnju po industrijskim odjeljcima NKD-a 2007. (od 05 do 36), najveća je vrijednost utroška sirovina i materijala zabilježena u odjeljku 10 Proizvodnja prehrambenih proizvoda (10 533 milijuna kuna), zatim u odjeljku 19 Proizvodnja koksa i rafiniranih naftnih proizvoda (5 508 milijuna kuna), a najmanji utrošak sirovina i materijala zabilježen je u odjeljku 09 Pomoćne uslužne djelatnosti u rudarstvu (5 milijuna kuna).

Ako analiziramo vrijednost utroška sirovina i materijala za industrijsku proizvodnju u 2020. prema podrijetlu sirovina i materijala (vidi grafikon G-2.), tada je utrošeno 7,2% (3 452 milijuna kuna) vlastito proizvedenih sirovina i materijala, a 92,8% (44 230 milijuna kuna) utrošenih sirovina i materijala nabavljeno je na tržištu od trećih osoba, od toga 46,9% (22 372 milijuna kuna) na domaćem tržištu, a 45,9% (21 858 milijuna kuna) na inozemnom tržištu (uvoz).

COMMENTARY

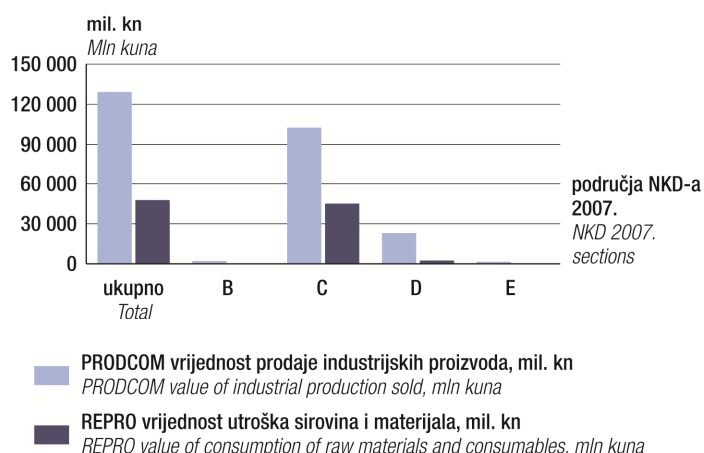

In 2020, the total value of consumed raw materials and consumables used as inputs in the industrial production process in enterprises engaged in industrial production in the Republic of Croatia amounted to 47 683 million kuna according to the coverage of the Annual Survey on Raw Material Consumption in Industry for 2020. According to the results of the PRODCOM Survey on Industrial Production in 2020⁷⁾, as compared to the total value of the sale of industrial products (output), out of the total of 129 186 million kuna generated by the same enterprises, the value of raw materials and consumables used as inputs in that industrial production had a share of 36.9% in the output value of industry. In other words, the total value of the sale of industrial products generated by enterprises in 2020 was 81 503 million kuna (63.1%) higher than the expenditure for consumed raw materials and consumables used as input in that production, according to a rough input-output calculation (see graph G-1).

The highest value of consumed raw materials and consumables used as inputs in the industrial production in 2020, according to the industrial sections of NKD 2007., was recorded in section C Manufacturing, 45 069 million kuna, followed by section D Electricity, gas, steam and air conditioning supply, 2 400 million kuna, and in section B Mining and quarrying, 206 million kuna, while the lowest one was recorded in section E Water supply; sewerage, waste management and remediation activities, 8 million kuna. Comparing the consumption by the NKD 2007. industrial divisions (05 – 36), the highest value of consumed raw materials and consumables was recorded in division 10 Manufacture of food products (10 533 million kuna), 19 Manufacture of coke and refined petroleum products (5 508 million kuna), while the lowest one was recorded in division 09 Mining support service activities (5 million kuna).

The analysis of the value of raw materials and consumables used as inputs in the industrial production in 2020 by origin of raw materials and consumables (see graph G-2.) showed that there were 7.2% (3 452 million kuna) of raw materials and consumables consumed from own-production, while 92.8% (44 230 million kuna) was purchased on the market from third parties, out of which 46.9% (22 372 million kuna) was purchased on domestic markets and 45.9% (21 858 million kuna) on non-domestic markets (import).

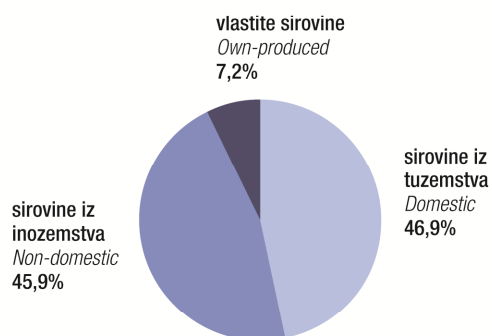

G-1. USPOREDBA VRIJEDNOSTI UTROŠKA SIROVINA I MATERIJALA TE PRODAJE INDUSTRIJSKIH PROIZVODA U 2020.

COMPARISON OF VALUES OF CONSUMPTION OF RAW MATERIALS AND CONSUMABLES AND INDUSTRIAL PRODUCTS SOLD, 2020

G-2. STRUKTURA VRIJEDNOSTI UTROŠKA SIROVINA I MATERIJALA PREMA PODRIJETLU U 2020.

STRUCTURE OF VALUE OF CONSUMPTION OF RAW MATERIALS AND CONSUMABLES, BY ORIGIN, 2020

7) Vidi komentar i metodološka objašnjenja u Priopćenju IND-2021-5-2 Proizvodnja i prodaja industrijskih proizvoda (PRODCOM) u 2020. – privremeni podaci, rujan 2021.

7) See the commentary and Notes on Methodology in the First Release IND-2021-5-2 Production and Sale of Industrial Products (PRODCOM), 2020 – Provisional Data, September 2021.

Najveću vrijednost utroška sirovina i materijala u Republici Hrvatskoj u 2020. imale su Grad Zagreb, u iznosu od 9 008 milijuna kuna i Primorsko-goranska županija, u iznosu od 6 666 milijuna kuna, dok su najmanje vrijednosti utroška sirovina i materijala za potrebe industrijske proizvodnje u 2020. zabilježene u Dubrovačko-neretvanskoj županiji, u iznosu od 88 milijuna kuna i Ličko-senjskoj županiji, u iznosu od 177 milijuna kuna.

Podaci o vrijednosti utroška sirovina i materijala za potrebe industrijske proizvodnje u 2020. dobiveni su obradom Godišnjeg istraživanja o utrošku sirovina, materijala i energenata industrije za 2020. (IND-21/REPRO), u kojem je obuhvaćeno 3 088 industrijskih lokalnih jedinica od pravnih osoba i obrtnika s 10 i više zaposlenih. Posebno naglašavamo da je istraživanje REPRO za 2020. imalo potpuno isti obuhvat kao već spomenuto godišnje istraživanje PRODCOM o industrijskoj proizvodnji za 2020. kako bi se postigla usporedivost i konzistentnost podataka za potrebe input-output analize na razini proizvoda/sirovina.

The greatest value of consumption of raw materials in the Republic of Croatia in 2020 was recorded in the City of Zagreb, 9 008 million kuna, and the County of Primorje-Gorski kotar, 6 666 million kuna, while the lowest value of consumption of raw materials for industrial production in 2020 was recorded in the County of Dubrovnik-Neretva, 88 million kuna, and the County of Lika-Senj, 177 million kuna.

Data on the value of consumed raw materials and consumables for the industrial production purposes in 2020 were compiled by the processing of the Annual Survey on Raw Materials and Energy Consumption in Industry for 2020 (IND-21/REPRO form), with the coverage of 3 088 industrial local units belonging to legal entities employing 10 and more persons. It must be stressed that the REPRO Survey for 2020 had exactly the same coverage as the already mentioned Annual PRODCOM Survey on Industrial Production in 2020 in order to achieve the comparability and consistency of data for the input-output analysis at the level of products/raw materials.

I. PREGLED ZA REPUBLIKU HRVATSKU
REPUBLIC OF CROATIA REVIEW

1. VRIJEDNOST UTROŠKA SIROVINA I MATERIJALA U 2019. I 2020. PO INDUSTRIJAMA POTROŠNJE – AGREGATI ZA INDUSTRIJSKE SKUPINE DJELATNOSTI NKD-a 2007.
