1) Since 1 January 2021, the United Kingdom has withdrawn from the European Union. The Protocol on Ireland and Northern Ireland ensures that Northern Ireland remains the constitutional part of the customs territory of the United Kingdom. Therefore, the data for Northern Ireland are included in the data on trade in goods with EU Member States.

2) The index exceeds 999.

3) As of 1 January 2021, the data for the United Kingdom do not include the data for Northern Ireland.

1) Since 1 January 2021, the United Kingdom has withdrawn from the European Union. The Protocol on Ireland and Northern Ireland ensures that Northern Ireland remains the constitutional part of the customs territory of the United Kingdom. Therefore, the data for Northern Ireland are included in the data on trade in goods with EU Member States.

2) The index exceeds 999.

3) As of 1 January 2021, the data for the United Kingdom do not include the data for Northern Ireland.

2) As of 1 January 2021, the data for non-EU Member States include data for the United Kingdom excluding Northern Ireland.

3) The index is not presented.

NOTES ON METHODOLOGY

Sources and methods of data collection

The data source for statistics on trading in goods with EU Member States is the Intrastat form used by the reporting units to report on arrivals and/or dispatches on a monthly basis, that is, for each month in which goods physically enter or leave the territory of the Republic of Croatia. The reporting units are all business entities, value added tax payers whose value of trading in goods with EU Member States exceeds the exemption threshold determined for the reference year. For 2022, an exemption threshold of 2.6 million kuna for arrivals and of 1.5 million kuna for dispatches has been determined. In order to achieve complete harmonisation with EU methodology and legislation, data on foreign trade in goods have been supplemented with trade value below the exemption threshold after being estimated on the basis of data on supplies and acquisitions of goods in/from EU Member States provided by the Tax Administration Office of the Republic of Croatia.

The First Results of the statistics concerning the foreign trade in goods of the Republic of Croatia are an integral part of this First Release and they contain the estimate of the trade value below the exemption threshold for the entire period they refer to.

The data source for statistics on trading in goods with third countries, that is, non-EU countries, are Single Administrative Documents on export and import of goods. The Croatian Bureau of Statistics receives the reviewed Single Administrative Documents from the Customs Administration of the Republic of Croatia in the form of data records.

Following basic methodological recommendations of the UN Statistical Office and Eurostat, the Croatian Bureau of Statistics statistically processes and disseminates collected Intrastat and Extrastat data as unique information on foreign trade in goods of the Republic of Croatia.

Legal basis

The legal basis for the conduct of the Intrastat survey is the European legislation related to statistics on trading in goods between EU Member States, the Regulation (EU) No. 2019/2152 as well as the Commission Implementing Regulation No. 2020/1197, the Official Statistics Act (NN, No. 25/20), the Annual Implementation Plan of Statistical Activities of the Republic of Croatia 2022 (NN, No. 42/22) and the Customs Administration Act (NN, Nos 68/13, 30/14, 115/16, 39/19 and 98/19). More detailed notes on methodology for this survey are published on the website of the Croatian Bureau of Statistics at [Državni zavod za statistiku - Intrastat \(gov.hr\)](http://Drzavni.zavod.za.statistiku.intrastat.gov.hr).

The legal basis for Extrastat is the European legislation related to statistics on trading in goods with third countries, the Regulation (EU) No. 2019/2152 as well as the Commission Implementing Regulation No. 2020/1197 and No. 2021/1225 and the Delegated Regulation (EU) No. 2021/1704, the EU Customs Legislations Implementation Act (NN, No. 40/16), the Official Statistics Act (NN, No. 25/20), the Annual Implementation Plan of Statistical Activities of the Republic of Croatia 2022 (NN, No. 42/22), the Customs Administration Act (NN, Nos 68/13, 30/14, 115/16, 39/19 and 98/19) and the Ordinance on Filing in the Single Administrative Document (NN, Nos 65/19 and 136/20).

Coverage and comparability

Statistics on foreign trade in goods include all goods exported from or imported into the country. Data on foreign trade in goods include both export and import based on gross inward and outward processing.

Statistical value of goods is the value of goods at the Croatian border. Values for export, i.e. dispatches, are shown as an FOB-type value, while values for import, i.e. arrivals, are shown as a CIF-type value.

Amounts expressed in foreign currencies are converted into kuna, euros and American dollars according to the monthly exchange rate lists determined for the reporting month. The mean exchange rate of the Croatian National Bank is used.

In certain tables, the sum total may not equal the sum of individual figures due to the rounding to thousands.

Data by type of activities have been presented according to the NKD 2007. (NN, Nos 58/07 and 72/07), which entered into force on 1 January 2008 and is based on the European classification NACE, Rev. 2, which is obligatory in EU Member States. Data are presented using a production approach by which export and import data are reported according to the manufacturing activity from which the product originates.

Goods listed under export and import are classified, for statistical needs, according to the Standard International Trade Classification (SITC, Rev. 4).

Data on export are shown by countries of destination, while two methodological criteria has been applied, by which data on import are shown by countries. In Extrastat, data on import are shown by countries of origin of goods, while, in Intrastat, data on arrivals of goods are presented by countries of dispatch.

As of 1 January 2021, Intrastat reporting has been changed. The Protocol on Ireland and Northern Ireland, which entered into force on 1 January 2021, allowed Northern Ireland to remain an integral part of the customs territory of the United Kingdom, but at the same time to have certain benefits from the single market of the European Union.

The Protocol on Ireland and Northern Ireland for PSIs in the Republic of Croatia (for the reporting period from January 2021 onwards) means that the dispatch and arrival of goods to and from Northern Ireland must still be reported in Intrastat forms, and data are included in data on trade in goods with EU Member States. As of 1 January 2021, trade in goods with the United Kingdom is included under Other countries in Europe, and exclude the data for Northern Ireland.

OPEC membership is subject to frequent changes. More detailed information about Member Countries are published on the website <https://www.opec.org/>.

Only Single Administrative Documents containing the date of acceptance in a customs office in a particular month are processed for that month as well as Intrastat forms submitted for the reporting month. Already issued data for previous months are changed during the current year in order to classify subsequently received and/or corrected Intrastat forms and Single Administrative Documents for earlier periods.

Monthly data are corrected until final data processing for the current year is done (the middle of the next year). Monthly data are considered provisional until the final processing of the current year and dissemination of final data is done. Monthly data for 2021 in this First Release are considered final.

Data on foreign trade in goods are available in the time series published on the website of the Croatian Bureau of Statistics under [Statistics in Line; Economy – Basic Indicators](#) (data from 2000) and [Foreign Trade in Goods](#) (data from 2010).
