

SHORT-TERM INDICATORS OF ENERGY STATISTICS, JULY 2026, FIRST RESULTS

In July 2026, electricity available for the inland market amounted to **1 779 GWh**. The availability of electricity for domestic consumption increased by **13.5%** compared to June 2026 and by **2.2%** compared to July 2025.

The amount of natural gas available for consumption in July 2026 was **4 249 TJ**, while the stocks increased by 1 720 TJ. The amount of natural gas available for domestic consumption in July 2026 increased by 31.6% compared to June 2026, while it decreased by 29.6% compared to July 2025.

The amount of petroleum products available for consumption in July 2026 was **424 thousand tonnes**, while the stocks decreased by 25 000 tonnes. The amount of petroleum products available for domestic consumption in July 2026 increased by 12.2% compared to June 2026 and by **21.8%** compared to July 2025.

The amount of electricity available for consumption also includes losses in the electricity network.

As for other energy products, the quantity available for the inland market also contains the quantities of energy products that may end up in warehouses, either in those of final consumers or in retail trade.

G-1 ELECTRICITY AVAILABLE FOR INLAND MARKET, JULY 2024 – JULY 2026

1 ELECTRICITY

3 HYDROCARBONS

3.1 CRUDE OIL

'000 tonnes

Supply	Crude oil							
	2025				2026			
	IV	V	VI	VII	IV	V	VI	VII
Production	38	39	38	39	38	39	37	38
Import	220	214	301	111	198	271	242	406
Export	-	-	-	-	-	-	-	-
Variation of stocks	9	9	113	-96	-37	5	-17	130
Refinery input	249	244	226	246	273	305	296	314

3.2 PETROLEUM PRODUCTS - TOTAL

'000 tonnes

Supply	Petroleum products							
	2025				2026			
	IV	V	VI	VII	IV	V	VI	VII
Production	290	316	299	307	310	365	334	351
Import	225	252	236	243	216	199	280	266
Export	193	192	192	204	229	237	241	218
Variation of stocks	51	6	-17	-2	6	-3	-5	-25
Available for inland market	271	370	360	348	291	330	378	424

3.2.1 MOTOR GASOLINE

'000 tonnes

Supply	Motor gasoline							
	2025				2026			
	IV	V	VI	VII	IV	V	VI	VII
Production	79	81	79	88	77	84	81	95
Import	20	15	24	20	11	14	22	22
Export	55	44	35	36	36	52	40	54
Variation of stocks	1	-9	11	14	6	-6	2	-1
Available for inland market	43	61	57	58	46	52	61	64

3.2.2 GAS/DIESEL OIL

'000 tonnes

Supply	Gas/diesel oil							
	2025				2026			
	IV	V	VI	VII	IV	V	VI	VII
Production	127	115	110	113	109	141	116	136
Import	144	215	183	189	182	165	228	217
Export	90	91	105	119	112	93	104	113
Variation of stocks	16	16	-26	-15	-2	10	14	-22
Available for inland market	165	223	214	198	181	203	226	262

3.2.3 FUEL OIL

'000 tonnes

Supply	Fuel oil							
	2025				2026			
	IV	V	VI	VII	IV	V	VI	VII
Production	25	39	29	29	35	51	50	46
Import	1	1	1	-	-	-	-	-
Export	27	27	28	27	27	53	57	27
Variation of stocks	-3	9	1	1	5	-5	-10	17
Available for inland market	2	4	1	1	3	3	3	2

3.2.4 OTHER PETROLEUM PRODUCTS

'000 tonnes

Supply	Other petroleum products							
	2025				2026			
	IV	V	VI	VII	IV	V	VI	VII
Production	59	81	81	77	89	89	87	74
Import	60	21	28	34	23	20	30	27
Export	21	30	24	22	54	39	40	24
Variation of stocks	37	-10	-3	-2	-3	-2	-11	-19
Available for inland market	61	82	88	91	61	72	88	96

4 CRUDE FUELS

4.1 HARD COAL

'000 tonnes

Supply	Hard coal							
	2025				2026			
	IV	V	VI	VII	IV	V	VI	VII
Production	-	-	-	-	-	-	-	-
Import	-	4	11	77	9	2	72	-
Export	-	-	-	-	-	-	-	-
Variation of stocks	-10	-5	1	37	3	-4	52	-58
Available for inland market	10	9	10	40	6	6	20	58

4.2 COKE

'000 tonnes

Supply	Coke							
	2025				2026			
	IV	V	VI	VII	IV	V	VI	VII
Production	-	-	-	-	-	-	-	-
Import	2	2	2	3	2	2	2	2
Export	-	-	-	-	-	-	-	-
Variation of stocks	-	-	-	-	-	-	-	-
Available for inland market	2	2	2	3	2	2	2	2

4.3 BROWN COAL

'000 tonnes

Supply	Brown coal							
	2025				2026			
	IV	V	VI	VII	IV	V	VI	VII
Production	-	-	-	-	-	-	-	-
Import	-	-	-	1	-	-	-	-
Export	-	-	-	-	-	-	-	-
Variation of stocks	-	-	-	-	-	-	-	-
Available for inland market	-	-	-	1	-	-	-	-

NOTES ON METHODOLOGY

The data are based on several statistical surveys, as follows: the Monthly Survey on Industrial Production and Persons Employed (IND-1/KPS/M form), the Monthly Survey on Oil Refineries (ERG-1/N form), the Monthly Survey on Import, Export and Stocks of Petroleum and Petroleum Products (ERG-2/N form), the Monthly Survey on Import, Export, Stocks and Deliveries of Natural Gas (ERG-1/P form), the Monthly Survey on Import, Export, Stocks, Deliveries and Consumption of Coal and Coke (ERG-1/U form), and the Monthly Survey on Power Plants (ERG-1/EL form), as well as on the data on foreign trade in goods of the Republic of Croatia and administrative data sources (part of the data on net electricity production was taken from HERA).

The monthly data are used for monitoring the changes in energy products according to the mentioned characteristics. Their sum for 12 months does not represent the annual balance data, due to the fast output of monthly data or the fact that some deliveries are cancelled, which may lead to slight deviations from the monthly data. Therefore, the following sources of annual data are recommended: the annual Statistical Report entitled "Energy Statistics" published by the Croatian Bureau of Statistics and the annual energy review entitled "Energy in Croatia" published by the Ministry of Economy.

Gross electricity production is the sum of the total electrical energy production by all the generating sets concerned (hydro power plants, thermal power plants and CHP on fossil fuels, thermal power plants and CHP on renewable fuels, wind power plants and solar power plants).

Net electricity production is the electrical energy supplied from a power station to a power-supply grid, and it represents the difference between the electrical energy produced in a generator and own supply.

Geothermal power plants produce energy available as heat emitted from within the Earth's crust, usually in the form of hot water or steam, excluding the surrounding heat collected by the heat pumps from the ground. This energy production is the difference between the enthalpy of the fluid produced in the production borehole and that of the fluid eventually disposed of.

Energy available for consumption is the quantity of energy products available for final consumption on the inland market, including losses and stocks at final consumers and in retail trade.

Crude oil is a mineral oil of natural origin that includes a mixture of hydrocarbons and associated impurities, such as sulphur. It exists in the liquid phase under normal surface temperature and pressure and its physical characteristics (density, viscosity, etc.) are highly variable. This category includes field or lease condensates recovered from associated and non-associated gases where they are commingled with the commercial crude oil stream.

Natural gas is comprised of gases, occurring naturally in underground deposits, whether liquefied or gaseous, consisting mainly of methane. It includes both "non-associated" gas originating from fields producing hydrocarbons only in gaseous form, and "associated" gas produced in association with crude oil, as well as methane recovered from coal mines (colliery gas). Manufactured gas (produced from municipal or industrial waste or sewage) is also included, while vented or flared quantities of natural gas are excluded.

Petroleum products are all products produced in petroleum refineries: refinery gas, liquefied petroleum gas, motor gasoline, kerosene, jet fuel, diesel oil, light fuel oil, fuel oil, naphtha, white spirit, lubricating oils, bitumen, paraffin waxes, petroleum coke and other refinery products.

Other petroleum products encompass liquefied petroleum gas in NGL plants.

Import includes the quantities of energy products that crossed the state border of the Republic of Croatia, regardless of whether or not they were cleared through the customs. The quantities of petroleum and petroleum products and liquid gas that are under contracts on production realised abroad are also to be presented in this table as import. Energy products in transit through the Republic of Croatia are not presented in this survey form either as import or as export.

Export includes the quantities that crossed the state border of the Republic of Croatia, regardless of whether or not they were cleared through the customs and whether or not they are owned by a Croatian resident.

For import and export of electricity, Eurostat's definition is used, which includes transit: amounts of electricity are considered imported or exported when they have crossed the political boundaries of a country, regardless of whether customs clearance has taken place or not. If electricity transits through a country, the amount should be reported as both import and export.

Variation of stocks includes stock changes at the beginning and at the end of a month in enterprises engaged in the production, transformation, import and export of energy. The difference is calculated by subtracting the state of stocks at the beginning of the first working day in a month from the state of stocks at the end of the last day in the same month.

Minor deviations may occur in the summary presentation of data due to the rounding of figures.

Abbreviations

CHP	combined heat and power generation
Eurostat	Statistical Office of the European Union
GCV	gross calorific value
GWh	gigawatt hour
HERA	Croatian Energy Regulatory Agency
m ³	cubic metre
mln	million
NGL	natural gas liquids
TJ	terajoule
'000	thousand
