METODOLOŠKA OBJAŠNJENJA

Izvori podataka

Podaci o mjesečnim neto i bruto plaćama te broju sati za koje su zaposlene osobe primile plaću dobiveni su obradom podataka iz Izvješća o primicima, porezu na dohodak i prirezu te doprinosima za obvezna osiguranja (obrazac JOPPD), koje se primjenjuje od 1. siječnja 2014.

Obveznici dostavljanja obrasca JOPPD jesu isplatiitelji svih vrsta dohodaka za koje je propisano o porezu na dohodak propisana obveza obračunavanja i plaćanja poreza po odbitku.

Obuhvat i usporedivost

Obuhvaćeni su zaposleni u pravnim osobama svih oblika vlasništva, tijelima državne vlasti i tijelima jedinica lokalne i područne (regionalne) samouprave na području Republike Hrvatske.

Nisu obuhvaćeni zaposleni u obrtu i slobodnim profesijama i zaposleni osiguranici poljoprivrednici te unutar podataka o prosječnim mjesečnim plaćama nedostaju podaci o njihovim isplatama.

Podaci o mjesečnim neto i bruto plaćama zaposlenih u pravnim osobama obuhvaćaju neto i bruto plaće zaposlenih koji imaju zasnovan radni odnos bez obzira na vrstu radnog odnosa i duljinu radnog vremena.

Zaposleni koji su primili plaću u nepunome radnom vremenu preračunani su na ekvivalent punoga radnog vremena.

Podaci o mjesečnoj neto i bruto plaći iskazuju se prema načelu obavljenih isplata u tekućem za prethodni mjesec, što odgovara dinamici isplata u najvećem broju pravnih osoba te se i prosjek plaće odnosi na mjesec za koji je isplata primljena, što ne vrijedi za isplaćene neoporezive primitke.

Neoporezivi primici koje je zaposlenik primio iskazani su u tablici 4.

Obuhvaćeni su sljedeći neoporezivi primici, prema šiframa obrasca JOPPD:

NOTES ON METHODOLOGY

Data sources

Data on monthly net and gross earnings as well as data on paid hours were gathered by processing data from the Report on Income, Income Tax and Surtax as well as Contributions for Mandatory Insurances (JOPPD form), in effect since 1 January 2014.

All persons or entities that are the payers of income for which the income tax regulations prescribe the obligation of accounting and paying deduction tax are under the obligation to submit the JOPPD form.

Definitions

Average monthly paid off net earnings comprise income of a person in employment earned for work done during regular working hours as well as annual leave, paid leave, public holidays and day-offs as prescribed by law, sickness leave up to 42 days, absence for continuing professional education, during lay-off and job stop caused against person's will and of no fault of his own and net pays on the basis of compensations, allowances and rewards in sums which are subjects to contributions, taxes and surtaxes.

Average monthly gross earnings include all kinds of net pays on the basis of employment and the following mandatory allocations: pension insurance contributions, income tax and surtax on income tax.

Number of paid hours is a number of hours for which persons in employment were paid. They include hours actually worked (hours done during regular working time and overtime hours) and hours not actually worked (annual leave, holidays, sick leave lasting less than 42 days and other paid hours not actually done). Paid hours do not include working hours not actually worked which are paid outside a legal entity (sick leave hours lasting over 42 days, maternity leave hours, hours of shorter working time done by parents, etc.).

Average monthly net and gross earnings per person in employment are calculated by dividing the total of pay-offs with the number of persons in employment expressed in full-time equivalent.

Average monthly net and gross earnings per paid hour are calculated by dividing the total of pay-offs with the total number of paid hours.

Indices of nominal net and gross earnings are calculated from the data on average monthly net and gross earnings for the respective months and year.

Real indices of net and gross earnings are calculated by dividing index of nominal net and gross earnings with a consumer price index for the respective month and year.

Median monthly net and gross earnings are calculated by determining a mean after earnings of persons in employment have been rank-ordered from the lowest to the highest one and shows that 50% of persons in employment get earnings that are equal to or lower than that amount (median) and another 50% get earnings that are equal to or higher than that amount (median).

Kvartilne mjesečne neto i bruto plaće izračunavaju se podjelom plaća zaposlenih na četiri jednaka dijela nakon rangiranja od najniže do najviše, a zatim odabirom iznosa plaće ispod kojeg se nalazi 25%, 50%, 75% i 100% plaća zaposlenih. Mogu se podijeliti na prvi (donji) kvartil, drugi kvartil (medijan), treći (gornji) kvartil i četvrti kvartil.

Prvi (donji) kvartil pokazuje da 25% zaposlenih prima plaću u iznosu jednakom ili manjem od prvoga kvartila, a 75% zaposlenih prima plaću jednaku ili veću od prvoga kvartila.

Treći (gornji) kvartil pokazuje da 75% zaposlenih prima plaću u iznosu jednakom ili manjem od trećega kvartila, a 25% zaposlenih prima plaću jednaku ili veću od trećega kvartila.

Decilne mjesečne neto i bruto plaće izračunavaju se podjelom plaća zaposlenih na deset jednakih dijelova nakon rangiranja od najniže do najviše, a zatim odabirom iznosa plaće ispod kojeg se nalazi 10%, 20%, 30%, 40%, 50%, 60%, 70%, 80%, 90% i 100% plaća zaposlenih.

U **prvom decilu** nalaze se zaposleni koji imaju najniže mjesečne plaće i pokazuje da 10% zaposlenih prima plaću u iznosu jednakom ili manjem od prvog decila, a 90% zaposlenih prima plaću jednaku ili veću od tog iznosa. U drugom decilu nalaze se zaposleni koji primaju plaću veću od onih koji se nalaze u prvom decilu i manju od onih koji se nalaze u trećem decilu itd.

Quartile monthly net and gross earnings are calculated by dividing the earnings of persons in employment into four equal parts after they have been rank-ordered from the lowest to the highest one. Then the amount is selected below which 25%, 50%, 75% and 100% of the earnings of persons in employment are placed. They can be divided to first (lower) quartile, second quartile (median), third (upper) quartile and fourth quartile.

The first (lower) quartile indicates that 25% of persons in employment get earnings that are equal to or lower than the first quartile, while 75% of persons in employment get earnings that are equal to or higher than the first quartile.

The third (upper) quartile indicates that 75% of persons in employment get earnings that are equal to or lower than the third quartile, while 25% of persons in employment get earnings that are equal to or higher than the third quartile.

Decile monthly net and gross earnings are calculated by dividing earnings of persons in employment into ten equal parts after they have been rank-ordered from the lowest to the highest one. Then the amount is selected below which 10%, 20%, 30%, 40%, 50%, 60%, 70%, 80%, 90% and 100% of earnings of persons in employment are placed.

The first decile includes persons in employment with the lowest monthly earnings and indicates that 10% of persons in employment get earnings that are equal to or lower than the first decile, while 90% of persons in employment get earnings that are equal to or higher than that amount. The second decile includes persons in employment who get earnings that are higher than those included in the first decile and lower than those included in the third decile, etc.
