## NOTES ON METHODOLOGY

### Sources and methods of data collection

Cumulative data are not always equal to the sum of individual monthly results due to the rounding of numbers to the nearest thousand.

The purpose of the survey is to collect data on the number of all aircraft movements and the traffic of passengers and freight on commercial operations in airports and air landing places of the Republic of Croatia.

The observation units and reporting units are airports in the Republic of Croatia. Data are collected in the form of electronic datasets and on the PZ/M-21 form.

### Coverage

The data on air traffic (total aircraft movements, traffic of passengers and freight in airports) relate to the activities of the airports of Zagreb, Split, Dubrovnik, Pula, Rijeka, Zadar, Osijek, Brač and the air landing place of Mali Lošinj.

**The number of total aircraft movements in airports** refers to the number of all (commercial and non-commercial) operations of landing and taking-off of an aircraft, except state flights (military, customs, police).

**Traffic of passengers in airports** includes the number of passengers who have departed or arrived on commercial operations. Passengers in direct transit are excluded. Direct transit passengers are passengers who, after a short stop, continue their journey on the same aircraft on a flight having the same flight number as the flight on which they arrived.

**Traffic of freight in airports** refers to the loaded and unloaded goods and mail on commercial operations other than the baggage of passengers. The freight in direct transit is excluded.
