# QUARTERLY GROSS DOMESTIC PRODUCT, REVISED DATA BY QUARTERS, 2025

To achieve consistency among national accounts data, the updated version of data on taxes, subsidies, government consumption expenditure and gross fixed capital formation is included in this quarterly calculation of the gross domestic product (GDP).

According to the revision policy of national accounts and government finance statistics / excessive deficit procedure statistics, if significant changes occur in the calculation of data within the April notification, the Croatian Bureau of Statistics is obliged to ensure consistency between data and publish the revised GDP data, thus also ensuring consistency in quarterly sector accounts.

The revised data refer to the period from the first quarter of 2022 to the fourth quarter of 2025. The largest changes occurred in 2025; therefore, the revised quarters for 2025 are published.

Detailed data can be downloaded on the link [PC-Axis](#) databases

The first estimate shows that GDP in real terms increased by **3.4%** in 2025, as compared to 2024.
