1. UVOD

Anketa o radnoj snazi najopsežnija je anketa o obilježjima tržišta rada provedena na uzorku kućanstava u Hrvatskoj. Njezin je cilj prikupiti podatke o stanju i promjenama na tržištu rada Hrvatske, tj. o veličini, strukturi i obilježjima aktivnoga i neaktivnog stanovništva.

Anketa se provodi u skladu s metodološkim pravilima i načelima Međunarodne organizacije rada (MOR), donesenima na 13. konferenciji statističara rada i Europskoga statističkog ureda (Eurostata), koji je metodološki uskladio anketu Europske unije. Primjena te metodološke podloge preduvjet je za dobivanje međunarodno usporedivih podataka iz područja tržišta rada koji omogućuju usporedbu Hrvatske s drugim zemljama.

Prikupljeni podaci važni su za potrebe praćenja, mjerenja i ocjenjivanja gospodarskih i društvenih trendova u Republici Hrvatskoj, a omogućuju i primjenu modernih metoda analize s područja ekonomije, sociologije, psihologije i drugih područja te su osnova za donošenje programa politike zapošljavanja.

Ovim Metodološkim uputama obuhvaćeni su svi elementi za definiranje, organizaciju i provođenje Ankete o radnoj snazi te za obradu podataka i objavljivanje rezultata.

1. INTRODUCTION

The Labour Force Survey (LFS) is the most comprehensive survey on labour market characteristics conducted on a sample of households in the Republic of Croatia. Its goal is to collect data on the state and changes to the labour market in Croatia, i.e. the size, structure and characteristics of the active and inactive population.

The LFS is carried out in compliance with methodological rules and guidelines of the International Labour Organization (ILO), adopted at the 13th International Conference of Labour Statisticians and the European Statistical Office (Eurostat), which has methodologically harmonised the EU survey. Application of the methodological basis is a prerequisite for acquiring international comparative data on the labour market, which provides a comparison of the Republic of Croatia with other countries.

The collected data is important for the purpose of tracking, measuring and assessing economic and social trends in the Republic of Croatia, and also allows the use of modern analysis methods in terms of economics, sociology, psychology and other fields that provide a basis for devising employment policy programmes.

The methodological guidelines cover all the elements necessary for defining, organising and conducting the Labour Force Survey, including processing the data and publishing the results.

1.

OSNOVNE ADMINISTRATIVNE INFORMACIJE

BASIC ADMINISTRATIVE INFORMATION

1. OSNOVNE ADMINISTRATIVNE INFORMACIJE

1.1. Naziv istraživanja

Anketa o radnoj snazi
Skraćeni naziv: ARS
Šifra (vrsta posla): 2581

1.2. Nositelj istraživanja (područje statistike) i periodika istraživanja

Anketa o radnoj snazi jest tromjesečno istraživanje koje provodi Državni zavod za statistiku uz sudjelovanje svojih područnih jedinica u županijama i upravnog tijela Grada Zagreba nadležnoga za poslove službene statistike.

Istraživanje se provodi u sklopu društvenih statistika, a nositelj je statistika tržišta rada.

Periodika istraživanja je kontinuirana, a obrada tromjesečna.

1.3. Pravna osnova statističkog istraživanja

Statističko istraživanje Anketa o radnoj snazi (ARS) provodi se na temelju Zakona o službenoj statistici (NN, br. 103/03. i 75/09.) i prema Programu statističkih istraživanja Republike Hrvatske.

1.4. Povjerljivost i zaštita podataka

Prema Zakonu o službenoj statistici, zajamčena je tajnost svih podataka koje dostavljaju izvještajne jedinice. Prikupljeni podaci upotrebljavaju se isključivo za statističke svrhe i ne objavljuju se kao pojedinačni, nego kao zbirni (agregirani) podaci.

1. BASIC ADMINISTRATIVE INFORMATION

1.1. Title of research

*Labour Force Survey
Abbreviated title: LFC
Code (type of activity): 2581*

1.2. The survey leading (field of statistics) and periodicity of survey

The Labour Force Survey is a quarterly survey conducted by the Croatian Bureau of Statistics with participation from the regional units in the counties and the administrative body of Zagreb City, the body authorised for official statistics activities.

Survey is conducted in terms of social statistics, with the field being labour market statistics.

Survey is carried out continuously with quarterly data processing.

1.3. Legal basis of the survey

Statistical survey titled the Labour Force Survey (LFS) is conducted pursuant to the Official Statistics Act (NN, no. 103/03 and 75/09) and according to the Programme of statistical Activities of the Republic of Croatia.

1.4. Confidentiality and data protection

Pursuant to the Official Statistics Act, confidentiality of all information submitted by the reporting units is ensured. The obtained data is used solely for statistical purposes and cannot be published as individual, but rather only as aggregate data.

2.

METODOLOŠKE OSNOVE

METHODOLOGICAL BASIS

2. METODOLOŠKE OSNOVE

2.1. Što je Anketa o radnoj snazi

Anketa o radnoj snazi u Hrvatskoj se provodi od 1996. Istraživanja tog tipa dio su statističke tradicije razvijenih zemalja već mnogo desetljeća, a i mnoge nerazvijene zemlje i zemlje u tranziciji također ih provode. Anketa je metoda istraživanja koja se temelji na uzorku jedinica promatranja i koristi se upitnikom za dobivanje odgovora o predmetu istraživanja.

Anketom o radnoj snazi prikupljaju se podaci o ekonomski aktivnom stanovništvu ili o radnoj snazi u Hrvatskoj prema preporukama Međunarodne organizacije rada (International Labour Organisation – ILO). Radnu snagu čine sve osobe koje rade ili traže posao radi stjecanja sredstava za život. Stoga su glavne kategorije koje se istražuju ukupna zaposlenost, nezaposlenost te demografske, obrazovne, socioekonomske i druge karakteristike pojedinaca koji se nalaze u svakoj od pojedinih skupina.

2.2. Cilj istraživanja

Glavni cilj Ankete o radnoj snazi jest dobiti uvid u ponašanje pojedinih skupina na tržištu rada na način koji omogućuje primjenu modernih metoda analize s bilo kojega znanstvenog područja: ekonomije, sociologije, psihologije i drugih. Jedan je od glavnih ciljeva Ankete da se pri definiranju ukupne zaposlenosti i nezaposlenosti primijene međunarodni standardi kako bi se te kategorije mogle uspoređivati s istovjetnim kategorijama u drugim zemljama, osobito onima Europske unije. Anketa o radnoj snazi oslanja se i u postupcima izbora uzorka i pri definiranju upitnika na preporuke Međunarodne organizacije rada.

2. METHODOLOGICAL BASIS

2.1. What is a Labour Force Survey

The Labour Force Survey has been conducted since 1996. Survey of this type has been part of the statistical traditional of developed countries for many decades, with many developing countries and transitional countries also conduct such survey. The survey is a research method based on an observational unit sample using a questionnaire for acquiring responses on respective research topics.

The Labour Force Survey collects data on economic activity of the population or the labour force in the Republic of Croatia and is based on recommendations by the International Labour Organisation (ILO). The labour force comprises all persons who are working or seeking a job for the purpose of acquiring means to sustain life. Therefore, the main categories that are explored are total employment, unemployment and demographic, educational, socio-economic and other characteristics of individuals that are found within each of the particular groups.

2.2. Goal of survey

The main goal of the Labour Force Survey is to gain insight into the behaviour of particular groups in the labour market in a way that allows the use of modern analysis methods from any scientific field: economics, sociology, psychology and other fields. One of the main goals of the survey, when defining total employment and unemployment, is the application of international standards in order to compare these categories with equivalent categories in other countries, especially those in the European Union. The Labour Force Survey also relies on procedures for selecting samples when defining the questionnaire as recommended by the International Labour Organisation.

2.3. Upotrijebljene klasifikacije

Nacionalna klasifikacija djelatnosti 2007., usporediva s međunarodnom klasifikacijom djelatnosti NACE 2007., Rev. 2, upotrijebljena je pri šifriranju obilježja djelatnosti.

Nacionalna klasifikacija zanimanja 2010. – NKZ 10., usporediva s međunarodnom klasifikacijom zanimanja ISCO-08, upotrijebljena je pri šifriranju obilježja zanimanja.

Međunarodna standardna klasifikacija položaja u zaposlenju, ICSE.

Nacionalna standardna klasifikacija obrazovanja (NSKO), koja je potpuno usporediva s Međunarodnom standardnom klasifikacijom obrazovanja ISCED 97.

2.4. Relevantni međunarodni standardi

Uredba Vijeća br. 577/98. od 9. ožujka 1998. o organizaciji Ankete o radnoj snazi u Zajednici.

Uredba Vijeća br. 430/2005 od 15. ožujka 2005. o uvođenju Uredbe Vijeća br. 577/98 o organizaciji Ankete o radnoj snazi u Zajednici u vezi s kodiranjem varijabli za transmisiju podataka od 2006. nadalje te za primjenu poduzorka u prikupljanju podataka o strukturnim varijablama.

Uredba Europske komisije br. 377/2008. od 25. travnja 2008. o donošenju Uredbe Vijeća br. 577/98 o organizaciji Ankete o radnoj snazi u Zajednici.

Uredba Europske komisije br. 365/2008. od 23. travnja 2008. o donošenju programa ad hoc modula za godine 2010., 2011. i 2012., za Anketu o radnoj snazi.

2.3. Classifications used:

The 2007 National Classification of Economic Activities, which is the equivalent of the International Statistical Classification of Economic Activities in the European Community (NACE rev. 2), was used in coding economic activities.

The 2010 National Classification of Occupations (NKZ 10), equivalent to the International Standard Classification of Occupations (ISCO-08), was used in coding occupation specifications.

The International Classification of Standard of Status Employment (ICSE).

The National Standard Classification of Education (NSKO), fully equivalent to the International Standard Classification of Education (ISCED 97).

2.4. Relevant international standards

Council Regulation (EC) No. 577/98 dated 9 March 1998, on the organisation of a labour sample force survey in the Community.

Commission Regulation No. 430/2005 dated 15 March 2005 on implementing Council Regulation (EC) No. 577/98 on the organisation of a labour force sample survey in the Community concerning the codification of variables to be used for data transmission from 2006 onwards, and the use of a sub-sample for the collection of data on structural variables.

Commission Regulation (EC) No. 377/2008 dated 25 April 2008 on implementing Council Regulation (EC) No. 577/98 concerning the organisation of a labour force sample survey in the Community.

Commission Regulation (EC) No. 365/2008 dated 23 April 2008 on adopting the programme of ad hoc modules, covering the years 2010, 2011 and 2012, for the labour force sample survey.

Uredba Europske komisije br. 220/2010. od 16. ožujka 2010. o donošenju programa ad hoc modula od 2012. do 2015., za Anketu o radnoj snazi

Commission Regulation (EU) No 220/2010 – adopting the programme of ad hoc modules, covering the years 2013 to 2015, for the labour force sample survey

2.5. Definicije i objašnjenja

Radno sposobno stanovništvo čine osobe starije od navršenih 15 godina.

Zaposleni su osobe koje su u referentnom tjednu obavljale bilo kakav posao za novac ili plaćanje u naturi. To su svi zaposlenici, samozaposlene osobe i članovi obitelji koji pomažu u poslovnom subjektu u vlasništvu člana obitelji (trgovačko društvo, poduzeće, obrt, slobodno zanimanje, poljoprivredno gospodarstvo) ili u nekome drugom obliku obiteljske priređivačke djelatnosti i osobe koje su radile za naknadu prema ugovoru, za neposredno plaćanje u novcu ili naturi. Anketom se, dakle, obuhvaćaju sve osobe koje su u referentnom tjednu radile barem jedan sat bez obzira na njihov formalni status i način plaćanja za obavljeni rad. Stoga zaposleni u Anketi o radnoj snazi može biti umirovljenik, student i kućanica.

Zaposleni su i svi zaposlenici ili samozaposlene osobe koje su u referentnom tjednu trenutačno bile odsutne s posla, a vratit će se na rad kod istog poslodavca ili na istu aktivnost nakon prestanka razloga za odsutnost.

Zaposlenici su osobe koje rade za poslodavca u državnome ili privatnom sektoru i za svoj rad primaju naknadu u novcu ili naturi.

Samozaposleni su poslodavci koji upravljaju poslovnim subjektom i zapošljavaju jednoga ili više zaposlenika te osobe koje rade za vlastiti račun i ne zapošljavaju zaposlenike.

Pomažući članovi jesu osobe koje nisu zaposlenici ili samozaposleni, a rade u poslovnom subjektu koji je u vlasništvu člana obitelji i za svoj rad ne primaju naknadu.

2.5. Definitions and explanations

*The **working age population** comprises all persons fifteen years of age and older.*

***Employed persons** are those who were engaged in any type of work for payment in cash or kind during the reference week. They include employees, self-employed, and family members who in some way assist family-run business (family enterprise, firm, craft, free-lancing, farm) or some other type of gainful activity, as well as persons who have worked through a contract, received direct payment in cash or kind. Therefore, the survey covers all persons who worked for at least one hour in the reference period, irrespective of their formal status or means of receiving payment. In this way, a retired person, a student or a housewife can also be classified as employed.*

Employed persons are also all employees or self-employed persons who were absent from work during the reference week but had a job to return to the same employer after the reason for such absence no longer existed.

***Employees** are persons who work for an employer in the state or private sector and receive for their work pay in money or kind.*

***Self-employed persons** are employers who run an enterprise and employ one or more employees, and persons who work for their own-account and do not employ workers.*

***Unpaid family workers** are those who were not in paid employment or self-employment, but not work in an enterprise owned by family member and do not receive payment for their work.*

Nezaposleni su osobe koje zadovoljavaju sljedeća tri kriterija:

- a) u referentnom tjednu nisu obavljale nikakav posao za novac ili plaćanje u naturi
- b) u posljednja četiri tjedna prije anketiranja aktivno su tražile posao
- c) ponuđeni posao mogle bi početi obavljati u iduća dva tjedna.

U nezaposlene ubrajaju se i osobe koje su našle posao i u skorijoj će budućnosti nastupiti na posao.

Podzaposleni su osobe koje uobičajeno rade manje od 36 sati na tjedan, htjele bi raditi više nego što uobičajeno rade i bile bi spremne raditi više u iduća dva tjedna (u okviru sadašnjega glavnog posla, na dodatnom poslu ili novome glavnom poslu).

Trenutačno aktivno stanovništvo ili radna snaga jesu zaposlene i nezaposlene osobe razvrstane prema ekonomskoj aktivnosti u referentnom tjednu.

Ekonomskom aktivnošću smatra se svaka aktivnost osoba koje pridonose ili su spremne pridonositi proizvodnji dobara i usluga u određenome (referentnom) razdoblju radi stjecanja sredstava za život.

Neaktivno stanovništvo jesu osobe do navršениh 15 godina i osobe unutar radno sposobnog stanovništva koje nisu zaposlene ili nezaposlene.

Stopa aktivnosti jest postotni udio aktivnog stanovništva (radne snage) u radno sposobnom stanovništvu.

Stopa zaposlenosti jest postotni udio zaposlenih u radno sposobnom stanovništvu.

Stopa nezaposlenosti jest postotni udio nezaposlenih u aktivnom stanovništvu (radnoj snazi).

Unemployed persons are those who meet the following three criteria:

- a) did not work for payment in cash or kind in the reference period;
- b) were actively seeking work during four weeks prior to being surveyed, and
- c) might commence an offered working position within the next two weeks.

Amongst the unemployed are those persons who have found a job and are to commence work in the near future.

Under employed persons are those who ordinarily work less than 36 hours per week but would like to work more and are prepared to accept more work in the next two weeks (within their present work, with additional work or with other work).

Currently active population or labour force consist of persons whose activity status in the reference week is either employed or unemployed.

Economic activity is activity of persons who contribute, or are willing to contribute to the production of goods or services in the reference period in order to provide means for life.

Inactive population are persons under the age of 15 years and persons within the working age population who are neither employed nor unemployed.

Activity rate represents the labour force as a percentage of the working-age population.

Employment/population ratio represents person the labour force as a percentage of working age population.

Unemployment rate represents unemployed persons as a percentage of the labour force.

2.6. Metodološka obilježja zbog kojih se međusobno razlikuju podaci o zaposlenosti

Državni zavod za statistiku uz anketne podatke objavljuje i podatke o zaposlenosti i nezaposlenosti prema administrativnim izvorima u Republici Hrvatskoj.

Izvor i obuhvat: podaci prema administrativnim izvorima temelje se na statističkim istraživanjima, mjesečnom i godišnjem istraživanju (obrasci RAD-1 i RAD-1G) kojima su obuhvaćeni zaposleni u pravnim osobama svih oblika vlasništva, tijelima državne vlasti i tijelima jedinica lokalne i područne samouprave na području Republike Hrvatske. Mjesečno istraživanje obuhvaća 70% zaposlenih iz svakog odjeljka NKD-a 2007. Podaci o zaposlenima u obrtu i slobodnim zanimanjima te zaposlenim osiguranicima poljoprivrednicima preuzimaju se iz evidencije aktivnih osiguranika Hrvatskog zavoda za mirovinsko osiguranje. Rezultati Ankete o radnoj snazi procjenjuju se na temelju reprezentativnoga statističkog uzorka privatnih kućanstava u Republici Hrvatskoj.

Referentno razdoblje: administrativni podaci o zaposlenim osobama odnose se na posljednji dan prethodnog mjeseca, dok se u Anketi prikupljaju podaci za referentni tjedan.

Razdoblje promatranja: administrativni podaci obrađuju se i objavljuju u mjesečnoj dinamici, dok se rezultati Ankete o radnoj snazi odnose na tromjesečno razdoblje.

Definicija zaposlene osobe: administrativni izvori primjenjuju formalnu definiciju zaposlenosti (zasnivanje radnog odnosa s poslodavcem, na određeno ili neodređeno vrijeme, neovisno o duljini radnog vremena i vlasništvu pravne osobe), dok su u Anketi o radnoj snazi kao zaposlene iskazane sve osobe koje su u referentnom tjednu obavljale

2.6. Methodological characteristics indicating a distinction between various employment data

The Croatian Bureau of Statistics along with the survey results also publishes data on employment and unemployment based on administrative sources in the Republic of Croatia.

Source and coverage: *Data from administrative sources is based on monthly and yearly survey (the RAD-1 and RAD-1G forms) that includes those employed in legal entities of all forms of ownership, bodies of the government authorities and bodies of the local and regional self-government units located in the Republic of Croatia. Monthly survey covers 70% of those employed in each of the divisions from the 2007 National Classification of Economic Activities (NKD 2007). Data on those employed in craft trades and freelancing as well as employed insured farmers are taken from the records on active pension insurance beneficiaries kept by Croatian Institute for Pension Insurance. The Labour Force Survey results are estimated on the basis of a representative statistical sample of private households in the Republic of Croatia.*

Reference period: *the administrative data on employed persons relates to the last day of the previous months, while the Labour Force Survey data are for each related reference week.*

Observation period: *administrative data is processed and published on a monthly basis, whereas results from the Labour Force Survey are related to a quarterly period.*

Definition of an employed person: *administrative sources apply a formal definition of employment (persons who have signed the work contract with the employer, for a definite or indefinite period of time, regardless of the duration of working hours and ownership of the legal entity), whereas the Labour Force Survey assumes that an*

bilo kakav posao za novac ili plaćanje u naturi i osobe koje su u referentnom tjednu bile trenutačno odsutne s posla, a vratit će se na rad kod istog poslodavca ili na istu aktivnost nakon prestanka razloga za odsutnost.

Objavljivanje podataka: administrativni podaci o zaposlenim osobama objavljuju se u mjesečnoj dinamici u Priopćenju "Zaposleni po djelatnostima", u godišnjem Priopćenju "Zaposleni prema djelatnosti i spolu – konačni podaci" te u Mjesečnim statističkim izvješćima Državnog zavoda za statistiku. Priopćenje i Statističko izvješće s rezultatima Ankete o radnoj snazi objavljuju anketne podatke o zaposlenim osobama u tromjesečnoj dinamici. Rezultati godišnjeg istraživanja RAD-1G objavljuju se i na nižim teritorijalnim razinama.

2.7. Metodološka obilježja zbog kojih se međusobno razlikuju podaci o nezaposlenosti

Izvor i obuhvat: podaci o registriranoj nezaposlenosti dobiveni su iz evidencije nezaposlenih osoba koji vodi Hrvatski zavod za zapošljavanje, dok se anketni podaci prikupljaju anketnim intervjuom u privatnim kućanstvima. Registar sadrži podatke o svim nezaposlenim osobama u Republici Hrvatskoj, dok se rezultati Ankete o radnoj snazi procjenjuju na temelju reprezentativnoga statističkog uzorka.

Referentno razdoblje: podaci iz Registra odnose se na posljednji dan svakog mjeseca, dok se u Anketi prikupljaju podaci za referentni tjedan.

Razdoblje promatranja: podaci iz Registra preuzimaju se u mjesečnoj dinamici, dok se rezultati Ankete o radnoj snazi obrađuju i objavljuju za tromjesečno razdoblje.

employed person is any person that undertook in the reference period any form of work for money or payment in kind or a person that was absent from work in the reference period, but shall return to work for the same employer or the same type of activity once the reason for absence has ceased.

Publishing data: administrative data on employed persons is published in the First Release title Persons in Paid Employment by Activity on a monthly basis, in the First Release titled Persons in Employment by Activity and by Sex – Final Data on an annual basis, and the Monthly Statistical Reports of the Croatian Bureau of Statistics. The First Release and Statistical Report along containing results of the Labour Force Survey release the survey data on employed persons in the quarterly dynamics. Results from the annual survey (RAD-1G) are also published at the lower territorial levels.

2.7. Methodological characteristics indicating a distinction between various unemployment data

Source and coverage: Data on registered unemployment is obtained from the records on unemployed persons kept by the Croatian Employment Service, while survey data is collected by interviewing private households. The register contains data on all unemployed persons in the Republic of Croatia, while results from the Labour Force Survey are estimated on the basis of the representative statistical sample.

Reference period: data from the register refer to the last day of each month, whereas data from the Labour Force Survey are collected for each reference week.

Observation period: data from the register are collected on a monthly basis, whereas results from the Labour Force Survey are processed and published for a quarterly period.

Definicija nezaposlene osobe: registrirana nezaposlena osoba jest osoba prijavljena kod Hrvatskog zavoda za zapošljavanje, odnosno svaka osoba koja zadovoljava kriterije koje definiraju Zakon o posredovanju pri zapošljavanju i pravima za vrijeme nezaposlenosti i Hrvatski zavod za zapošljavanje. U Anketi o radnoj snazi nezaposlene osobe jesu osobe koje prema međunarodnoj definiciji u referentnom tjednu nisu obavljale posao za plaćanje u novcu ili u naturi, aktivno su tražile posao u razdoblju od četiri tjedna prije anketiranja, eventualni ponuđeni posao mogle bi početi obavljati u sljedeća dva tjedna te osobe koje su našle posao na kojem će početi raditi u skoroj budućnosti nakon anketiranja.

Objavljivanje podataka

Podaci o broju registriranih nezaposlenih osoba i registriranoj stopi nezaposlenosti objavljuju se u mjesečnoj dinamici u Priopćenju "Zaposleni prema djelatnostima i spolu" te u Mjesečnim statističkim izvješćima Državnog zavoda za statistiku. Priopćenje i Statističko izvješće s rezultatima Ankete o radnoj snazi objavljuju usporedbu anketne i registrirane stope nezaposlenosti u tromjesečnoj dinamici prema spolu. Istodobno administrativne podatke o nezaposlenosti objavljuje i Hrvatski zavod za zapošljavanje i na nižim teritorijalnim razinama.

Podaci pokazuju da je stopa nezaposlenosti prema podacima iz administrativnih izvora veća u odnosu na pokazatelj izračunan prema podacima Ankete o radnoj snazi. To je posljedica, s jedne strane, ekonomskih aktivnosti onih kategorija stanovništva koje su prema formalnom statusu nezaposlene ili neaktivne, a s druge strane, u podacima o nezaposlenima prema administrativnim izvorima zastupljen je uz stvarno nezaposlene osobe i velik udio osoba koje prema odrednicama Ankete nisu nezaposlene, ali preko tog statusa ostvaruju neka socijalna ili materijalna prava.

Definition of an unemployed person: a registered unemployed person is a person who is registered with the Croatian Employment Service, that is, a person who meets criteria defined by the Job Placement and Unemployment Insurance Act and the Croatian Employment Service. An unemployed person in the Labour Force Survey is someone who, according to international definition, did not undertake work in the reference week for payment in money or in kind, did not actively look for work in the period four weeks prior to the survey, might be able to commence an eventually offered job in the next two weeks or a person who has found a job and will commence work shortly after the survey.

Publishing data

Data on the number of registered unemployed persons and the registered unemployment rate is published on a monthly basis in the First Release titled Persons in Employment by Activity and by Sex, and in the Monthly Statistical Reports published by the Croatian Bureau of Statistics. The First Release and Statistical Report containing results from the Labour Force Survey results are published a comparison of surveyed and registered unemployment rates by sex on a quarterly basis. Concurrently, the Croatian Employment Service publishes administrative data on unemployment at lower territorial levels.

The data indicate that the unemployment rate based on administrative data sources is higher than the rate calculated from the Labour Force Survey. This is due to economic activities of those categories of the population that are, according to formal status, unemployed or inactive. It is also due to the fact that the data on unemployed also includes, based on administrative sources and alongside the actually unemployed persons, a large percentage of persons who, according to the determinants in the Labour Force Survey, are not unemployed, but instead achieve some form of social or material benefits on account of the mentioned status.

3.

ORGANIZACIJA I PROVOĐENJE ISTRAŽIVANJA

SURVEY ORGANISATION AND CONDUCTION OF THE SURVEY

3. ORGANIZACIJA I PROVOĐENJE ISTRAŽIVANJA

3.1. Prikupljanje podataka

Anketa o radnoj snazi prvi je put u Republici Hrvatskoj provedena u studenome 1996. kao godišnje istraživanje. Na isti način provedena je u lipnju 1997. U skladu s potrebama za učestalijim podacima i prema iskustvima europskih zemalja te preporukama međunarodnih institucija, od 1998. do 2006. provodila se anketiranjem dijela kućanstva iz uzorka svakog mjeseca. Rezultati se obrađuju i objavljuju u polugodišnjoj dinamici. Tijekom 2006. Državni zavod za statistiku osigurao je preduvjete za unapređenje Ankete o radnoj snazi u metodološkome i provedbenom smislu radi dobivanja preciznijih rezultata i potpunog usklađivanja s pravnom stečevinom Zajednice. Stoga se od 2007. Anketa provodi kontinuirano, odnosno kućanstva se anketiraju neprekidno tijekom cijele godine. To znači da je svaki tjedan referentni i anketni, odnosno provedbeni. Prikupljeni podaci kontinuirano se dostavljaju Državnom zavodu za statistiku, koji obrađuje i objavljuje rezultate u tromjesečnoj dinamici od početka 2007.

U skladu s tim anketari obilaze kućanstva svaki tjedan i na izabranim adresama obavljaju anketni intervju koji u prosjeku traje dvadesetak minuta. Svako kućanstvo koje je ušlo u uzorak o Anketi obaviješteno je pismom prije dolaska anketara. Anketar je dužan u pet pokušaja obići svaku stambenu jedinicu i ostvariti intervju. U upitniku moraju biti zabilježeni i svi takvi dolasci anketara te svi razlozi nesudjelovanja u Anketi. Na temelju Zakona o službenoj statistici zajamčena je tajnost svih podataka koje ispitanici daju o sebi i o članovima svoga kućanstva. Prikupljeni podaci upotrebljavaju se isključivo za statističke svrhe.

3. SURVEY ORGANISATION AND CONDUCTION OF THE SURVEY

3.1. Data collection

The Labour Force Survey was carried out for the first time in the Republic of Croatia in November 1996 as an annual survey. It was carried out again in the same manner in June 1997. In order to meet the requirement for more frequent data and based on the experience of European countries and recommendations of international institutions, in the period between 1998 and 2006 some households from a selected sample were surveyed each month. The results were processed and published on a half-yearly basis. In 2006, the Croatian Bureau of Statistics created the prerequisites for improving the Labour Force Survey in terms of methodology and implementation for the purpose of acquiring more precise results and full harmonisation with the Acquis Communautaire. Subsequently, the Labour Force Survey has been continually conducted since 2007, i.e. households are continually surveyed throughout the whole year. This means that each week is both reference and interviewing week. The collected data is constantly forwarded to the Croatian Bureau of Statistics, which has been processed and published on quarterly dynamics since the beginning of 2007.

Accordingly, each week interviewers visit households and at selected addresses conduct interviews, which on average lasts for about twenty minutes. Each household included in the sample for the Labour Force Survey is notified by letter prior to the interviewer's visit. The interviewer is obliged to attempt five visits to each dwelling unit in order to carry out the interview. The questionnaire must contain all such visits and reasons for failing to participate in the Labour Force Survey. The Official Statistics Act ensures confidentiality of all information provided by the respondents concerning themselves and members of their household. The collected data is then used solely for statistical purposes.

Na terenu radi 160 anketara čiji rad organizira i kontrolira 28 kontrolora. Ispunjene upitnike preuzete od anketara kontrolori provjeravaju prije dostave Državnom zavodu za statistiku i uočene pogreške ispravljaju u suradnji s anketarima.

3.2. Ciljano stanovništvo

Ciljano stanovništvo koje se prati Anketom određuje se prema prisutnosti članova u intervjuiranom kućanstvu. Pri definiranju prisutnosti prihvaćeno je načelo "de facto" stanovništva, koje isključuje članove kućanstva s boravištem na drugoj adresi na kojoj rade ili se školuju dulje od 12 mjeseci, a ne uključuje privremeno prisutne članove drugog kućanstva.

Iz metodoloških razloga osobe koje žive u kolektivnim kućanstvima (domovi, internati, samostani, bolnice itd.) nisu uključene u istraživanje. Stoga se rezultati temelje na populaciji koja živi u privatnim kućanstvima.

3.3. Jedinica promatranja

Jedinica promatranja ankete jest kućanstvo i svi pojedinci u njemu. Kućanstvo čine pojedinci koji žive zajedno i dijele sve ili veći dio ukupnih troškova života. Kućanstvo je, dakle, mala ekonomska zajednica koja nije uvijek, iako najčešće to jest, zajednica srodnika. Unutar svakoga kućanstva anketiraju se svi pojedinci bez obzira na dob i trenutačnu prisutnost, ali se isključuju oni koji su odsutni dulje od jedne godine. Naravno, za djecu, a katkad i za starije osobe, odgovore daju drugi članovi kućanstva.

3.4. Razdoblje promatranja

Razdoblje promatranja Ankete, odnosno referentno razdoblje u kojem se mjeri zaposlenost, nezaposlenost i neaktivnost, jest svaki tjedan u godini. Dakle, svaki je tjedan i referentni i anketni, tj. provedbeni.

A total of 160 interviewers operate in the field and their work is organised and controlled by 28 field supervisors. The completed questionnaires obtained from the interviewers are verified by the field supervisors prior to submission to the Croatian Bureau of Statistics, whereby noted errors are corrected in cooperation with interviewers.

3.2. The target population

Target population covered by the Survey is determined by the presence of interviewed household members in the household. The definition of presence is based on the "de facto" principle, which excludes household members living at some other address where they work or go to school for more than 12 months, as well as temporarily present members of another household.

For methodological reasons, persons who live in collective household (homes, dormitories, monasteries, hospitals, etc.) are not included in the research. Therefore, the results are based on a population that lives in private households.

3.3. Observational unit

A survey observational unit is a household and all the individuals in it. A household consists of individuals that live together and share the full or partial costs of living. The household is, therefore, a small economic community, which is not always, even though most often it is, a community of relatives. Within each household, all the individuals are surveyed regardless of their age and presence or absence, but those that have been absent for over a year are excluded. Naturally, other household members will provide answers for children, and at times, on behalf of the elderly.

3.4. Observation period

The observation period or reference period for the Labour Force Survey used to measure employment, unemployment and inactivity, is each week of the year. Hence, each week is a reference and interviewing week.

Većina se pitanja odnosi na ekonomsku aktivnost pojedinaca u referentnom tjednu, a samo se neka pitanja odnose na druga razdoblja koja su u pitanjima jasno naznačena.

Most of the questions relate to an individual's economic activity in the reference week, but only some questions relate to other periods that are clearly indicated in the questions.

3.5. Obuhvat i usporedivost

Kao okvir za izbor uzorka od 1996. do 1999. poslužili su podaci iz Popisa stanovništva, kućanstava i stanova 1991. godine. U tom razdoblju hrvatska područja izravno zahvaćena ratom nije bilo moguće uključiti u okvir za izbor jedinica uzorka.

U 2000. i 2001. primijenjen je okvir za uzorak temeljen na bazi podataka Hrvatske elektroprivrede koja sadrži adrese svih kućanstava s područja Republike Hrvatske. Time se uzorak i podaci koji proizlaze iz Ankete počevši od 2000. odnose na cijelu Republiku Hrvatsku.

Od početka 2002. u provedbi Ankete o radnoj snazi primjenjuje se novi okvir za uzorak temeljen na podacima iz Popisa stanovništva, kućanstava i stanova 2001. godine. Prema metodologiji Ankete ne obuhvaća se institucionalno stanovništvo (domovi, samostani, bolnice za trajni smještaj osoba i slično).

3.5. Coverage and comparability

The framework for selecting a sample in the period from 1996 to 1999, utilised data from the 1991 Census. In that period, it was not possible to include Croatian territories directly afflicted by the war in the framework used for selecting the sample units.

The database of the Croatian Electrical Utility Company containing data on households spread across the whole Croatian territory was used as a sample frame in 2000 and 2001. Hence, since 2000, the sample and the Survey results relate to the whole Republic of Croatia.

Starting from the first half-year of 2002, the new sample frame has been used for the Labour Force Survey. It is based on 2001 Census data. The methodology of the survey determines that the population residing in institutions (such as homes, convents, hospitals for long-term treatments, etc.) is not included in the sample frame.

3.6. Nacrt uzorka

Anketa o radnoj snazi provodi se na slučajnom uzorku privatnih kućanstava. Od 1996. do 2006. uzorak za Anketu bio je posebno definiran za svako provedbeno razdoblje, tj. nije bilo panelnog dijela uzorka. Od 2007. uvedena je i takva komponenta u nacrt uzorka te se kućanstva ponovljeno anketiraju četiri puta.

Dinamika anketiranja jest sljedeća: kućanstva se anketiraju u dva uzastopna tromjesečja, izostavljaju iz uzorka u iduća dva tromjesečja te ponovno anketiraju u još dva uzastopna tromjesečja. Takav model panela koji primjenjujemo u Hrvatskoj naziva se 2-(2)-2. Tako se omogućuje vremensko praćenje tijekova osoba na tržištu rada, i to u tromjesečnoj i godišnjoj dinamici.

3.6. Sample design

The Labour Force Survey was conducted on a random sample of private households. In the period from 1996 to 2006, the sample was defined separately for each period, that is, the sample did not have a panel component. Since 2007, this type of component has been introduced in the sample design and households are repeatedly surveyed four times.

The surveying dynamics are as follows: households are surveyed in two consecutive quarters, which are then by-passed in the following two quarters, and interviewed again for two consecutive quarters. This panel model applied in Croatia is called 2-(2)-2. This allows time tracking of the flow of persons on the labour market, on a quarterly and yearly basis.

Prosječno se u jednom tromjesečju u uzorak izabere oko 5 600 stambenih jedinica. Anketiraju se svi članovi svih privatnih kućanstava koji stalno žive u tim stambenim jedinicama.

Slučajan uzorak privatnih kućanstava izabran je u dvije etape, a upotrijebljeni nacrt uzorka jest dvoetažno uzorkovanje grupa. Prije izbora uzorka formirani su tzv. segmenti. Segmenti su teritorijalne jedinice nastale grupiranjem susjednih popisnih krugova, a popisni krugovi jesu teritorijalne jedinice formirane za potrebe Popisa stanovništva 2001. Segmenti su stratificirani u 21 stratum. Stratum čini 20 županija i Grad Zagreb.

U prvoj etapi iz svakog stratum izabran je slučajni uzorak segmenata, a u drugoj etapi slučajni uzorak stanova nastanjenih privatnim kućanstvima u izabranim segmentima. Anketirana su sva privatna kućanstva u izabranim stanovima.

Pri provedbi Ankete u svakome izabranome nastanjenom stanu intervjuiraju se sva privatna kućanstva koja u vrijeme provedbe Ankete žive u tom stanu i svi njihovi članovi, vodeći računa o tome da je stan definiran jednako kao u Popisu 2001. Pritom se svako privatno kućanstvo smatra zasebnom jedinicom promatranja i za njega se ispunjava zasebni upitnik.

Ako na listi postoje podaci o više privatnih kućanstava u jednome izabranome nastanjenom stanu, tada je pri slanju obavijesti o izboru nastanjenog stana u Anketu dovoljno poslati obavijest na ime nositelja jednog od privatnih kućanstava.

3.7. Rezultati istraživanja i objava podataka

Obradom podataka iz Ankete o radnoj snazi dobivaju se sljedeći podaci: radno sposobno stanovništvo prema aktivnosti, dobi i spolu, mjere aktivnosti prema dobi i spolu, radno sposobno stanovništvo prema školskoj spremi i spolu, zaposleni prema položaju u zaposlenju i spolu, prosječni sati rada na

On average, in a single quarterly period, around 5,600 dwelling units are selected into a sample. All members in the same private households that live in such dwellings are surveyed.

The random sample of private households is chosen in two stages, whereas the used sample design involves two-stage cluster sampling. Before choosing the sample, so-called segments are formed. Segments are territorial units formed by grouping the neighbouring enumeration districts, established for the purpose of conducting the 2001 Population Census. Segments are stratified into 21 strata. The strata comprise 20 counties and the City of Zagreb.

In the first stage, the random sample of segments is chosen from each stratum and in the second stage the random sample of dwellings inhabited by private households in the selected segment. All private households living in the chosen dwellings are interviewed.

When conducting the survey in each of the selected inhabited dwellings, all private households found at the time of the survey to be living in the respective dwelling are surveyed, while taking into account that the dwelling adheres to the definition of a dwelling in the 2001 Census. Subsequently, each private household is considered a separated observational unit and a separate questionnaire is therefore completed for it.

If the list contains information on multiple private households in the one selected occupied dwelling, when sending a notice on selection of the occupied dwelling it is adequate to send a notice to the head of one of the private households.

3.7. Survey results and publication of data

In processing data from the Labour Force Survey, the following data is obtained: working age population based on economic activity, age and sex, measure of economic activities based on age and sex, working age population based on schooling and sex, those employed based on working position

glavnom poslu u referentnom tjednu prema sektoru djelatnosti i spolu, struktura zaposlenih prema područjima NKD-a 2007. i spolu, zaposleni prema glavnim rodovima zanimanja NKZ-a 2010. i spolu, nezaposleni prema duljini traženja posla te registrirani nezaposleni koji prema Anketi nisu nezaposleni.

Također se objavljuju podaci o radnoj snazi na razini tri prostorne jedinice za statistiku 2. razine, kao i podaci o zaposlenim osobama prema sektorima djelatnosti NKD-a 2007. na razini tri prostorne jedinice za statistiku 2. razine (Sjeverozapadna Hrvatska, Središnja i istočna Hrvatska i Jadranska Hrvatska).

Prvi rezultati (radno sposobno stanovništvo prema aktivnosti i spolu) objavljuju se 13 tjedana nakon završetka tromjesečja na internetskim stranicama Državnog zavoda za statistiku prema Programu publiciranja i Kalendaru objavljivanja statističkih podataka.

U priopćenjima Državnog zavoda za statistiku podaci se objavljuju tri tjedna nakon prvih rezultata također prema unaprijed najavljenim rokovima navedenima u Programu publiciranja i Kalendaru objavljivanja statističkih podataka.

U godišnjoj periodici podaci se objavljuju u Statističkom ljetopisu Republike Hrvatske, Statističkom izvješću "Rezultati Ankete o radnoj snazi Hrvatska – Europa" i u Statističkim informacijama.

3.8. Korisnici podataka

Glavni korisnici podataka jesu vladina tijela, zavodi i druge državne institucije, tijela jedinica lokalne uprave i samo-uprave, sindikati, udruge poslodavaca, istraživači, znanstvenici, novinari i među-narodne organizacije kao što su Međuna-rodna organizacija rada, Svjetska banka, OECD, MMF itd.

and sex, average work hours on the primary job in the reference week based on economic activity sector and sex, structure of those employed based on sections from the 2007 National Classification of Economic Activity (NKD 2007.) and sex, those employed based on major occupational groups and sex, those unemployed based on duration of job seeking and the registered unemployed who according to the survey are not unemployed.

Data on the labour force at the level of three spatial units for 2nd level statistics are published, as well as data on employed persons based on economic activity sectors from the 2007 National Classification of Economic Activity (NKD 2007.) at the level of three spatial units for 2nd level statistics (North-West Croatia, Central and East (Panonian) Croatia and Adriatic Croatia).

The first results (working age population based on economic activity and sex) are published 13 weeks after the quarter on the Croatian Bureau of Statistics' website in accordance with the Publishing Programme and Calendar of Statistical Data Issues.

The First Releases issued by the Croatian Bureau of Statistics are published three weeks following the first results also according to preannounced deadlines stated in the Publishing Programme and Calendar of Statistical Data Issues.

In the yearly periodicity data is published in the Statistical Yearbook of the Republic of Croatia, in the Statistical Report titled Labour Force Survey Results Croatia-Europe and in the Statistical Information.

3.8. Data users

The main users of the data are the government bodies, bureaus and other state institutions, bodies of the local government and self-government units, trade unions, employer associations, researchers, scientists, journalists and international organisations such as the International Labour Organisation, the World Bank, OECD, IMF, etc.

4.

INSTRUMENTI ISTRAŽIVANJA

SURVEY INSTRUMENTS

4.1. KONTROLA KONZISTENTNOSTI

U okviru jednog segmenta A2 moraju biti svi isti A8

A7, A15 i A19 minute = 1 – 59

A7 – A10 ≠ Ctrl ≠ 0

A12 – A23 ≠ Ctrl i ≠ 0

A11 i A12 (2,3) može biti Ctrl

A13 = 5 izlistaj identifikaciju i tekst

A14 ≠ Ctrl

A19A19 min ≠ A15 min i sati

A19bA19b min ≠ 60 (minute mogu biti 1 – 59)

G 3P3a > 0, onda P15 = 2 ili 5

G 3 aP3a > 0, onda P3a ≠ od rednog broja

G 3 b P3b > 0, onda P3b ≠ od rednog broja

G 3 cP3c > 0, onda P3c ≠ od rednog broja

G8P8 ako je provedbena godina, onda mjesec ≤ provedbenome mjesecu <

G10P10 god > 0P14 god =>P10 god

G10.1P10 ako je provedbena godina, onda mjesec ≤ provedbenome mjesecu

G 13 Ako je P13 > 0, onda P13 < 2012

G14P14 > 0 P10 (mjesec) > P14 (mjesec)

G16 Ako je P16 > 0 onda je (A7 god – P14 god - P16) >=6

G17.1P17 = 1P16 = 0

G17.2P17 = 2P16 = 1 – 3

G17.3P17 = 3 P16 = 3 – 7

G17.4P17 = 4P16 = 3 – 11

G17.5P17 = 5P16 = 8 – 12

G17.6P17 = 8P16 = 11 – 16

G17.7 P17 = 9 – 11P16 = 16 – 22

G17.8P17 = 7 P19 = 001

G17.9P17 = 6ili 7P16 = 12

G18P18 > 0P18 => P14 + 6 + P16

G19.1P19 = 001P17 = 02, 03, 04, 07

G20.1P20 = 1 ili 2P 14 god >1982 (mlađi od 30)

G21.1P21 = 3,4 ili 5P17 = 04

G21.2P21 = 6 ili 7P17 = 06 ili 07

G21.3P21 = 8 ili 9P17 = 09 ili 10

G25P25 = 3P24 = 4, 5, 6

G24P24 = 5P25 > 1

G28P28 = 10P4 = 2

G29.1P29 ili P30 = 1P51 > 0

G29.2P29 = 2P51 = 0

4.1. CONSISTENCY CONTROL

In terms of a single segment A2 must all be the same as A8

A7, A15 i A19 minute = 1 – 59

A7 – A10 ≠ Ctrl ≠ 0

A12 – A23 ≠ Ctrl i ≠ 0

A11 i A12 (2,3) can be Ctrl

A13 = 5 list identification and text

A14 ≠ Ctrl

A19A19 min ≠ A15 min and hours

A19bA19b min ≠ 60 (minutes can be 1 – 59)

G 3P3a > 0, then P15 = 2 or 5

G 3 aP3a > 0, then P3a ≠ from a sequential number

G 3 b P3b > 0, then P3b ≠ from a sequential number

G 3 cP3c > 0, then P3c ≠ from a sequential number

G8P8 if an implementation year, then month ≤ implementation month <

G10P10 year > 0P14 year =>P10 year

G10.1P10 if an implementation year, then month ≤ implementation month

G 13 If P13 > 0, then P13 < 2012

G14P14 > 0 P10 (month) > P14 (month)

G16 If P16 > 0 then (A7 year – P14god - P16) >=6

G17.1P17 = 1P16 = 0

G17.2P17 = 2P16 = 1 – 3

G17.3P17 = 3 P16 = 3 – 7

Treba razraditi kontrolu kontingenata

1. kontrola A6 unutar A5 – ako je A1, A2, A3, A4 isto, a A5 i A6 > 1 prebrojiti A6, ako je A1, A2, A3, A4 isto, a A5 = 0 izlistati
2. upar uzorka i materijala A1, A2 i A3, A4 isti – što nije u materijalu, a jest u uzorku i što je u materijalu, a nije u uzorku
3. izlistati ako nema A23
4. izlistati ako je A 10 (1, 2 ili 3) ≠ A5
5. izlistati ako je A 10 = 4, a A5 nije = 0

KONTROLA BROJNOG STANJA

- kontrola onog što je u adresaru, a nije u materijalu
- kontrola onog što je u materijalu, a nije u adresaru
- kontrola broja unesenih kućanstava u stanovima s više kućanstava
- kontrola kućanstava s istim ključem, tj. A1, A2 i A3, A4 mora imati isti A8, A9 i A10, ako je različito, pogreška

G104 and G105A12 = 1P104 & P105 > 0 or CTRL
K, R, person 1

Contingency control should be devised

1. control A6 within A5 – if A1, A2, A3, A4 same, also A5 and A6 > 1 recount A6, if A1, A2, A3, A4 same, but A5 = 0 list
2. upar sample and material A1, A2 and A3, A4 same – which is not in the material, but is in the sample and what is in the material, but is not in the sample
3. make list if there is no A23
4. make list if A 10 (1, 2 or 3) ≠ A5
5. make list if A 10 = 4, but A5 not = 0

CONTROLLING THE NUMBER OF STATES

- verification of what is in the address list, and not in the material
- verification of what is in the material, and not in the address list
- verification of the number of entered households in dwellings with multiple households
- verification of households with the same key, i.e. A1, A2 and A3, A4 must have the same A8, A9 & A10, if different, error

KONTROLA KONZISTENTNOSTI

Za svako kućanstvo (obrazac ARS 2012.) prebrojiti:

- Broj anketiranih osoba ($P\ 103 > 0$)
- Broj nositelja kućanstva ($P\ 2 = 1$)
- Broj supružnika ($P\ 2 = 2$ i $P3a$)

Broj osoba mora biti jednak polju A14 (ako nije – pogreška)
Nositelju svakom kućanstvu mora biti jedan i samo jedan nositelj kućanstva
Supružniku svakom kućanstvu može biti najviše jedan supružnik, ali samo na P2

Za svako razdoblje postoji referentni datum koji se unosi u posebnu datoteku. Anketiraju se osobe koje su do referentnog datuma navršile 15 godina. (ako je $P14$ = referentni datum – osoba ima točno 15 godina)

Punih 15 pogreška koja se javlja ako je $P13 < 1$ i $P14 \leq$ referentni datum, a $P15 < 1$

Nepunih 15 pogreška koja se javlja ako je $P13 < 1$ i $P14 >$ referentni datum, a $P15 > 0$

Sljedeće se kontrole provode ako su osobe trajno prisutne u kućanstvu ($P12$.)

Spol pogreška je ako nositelj ($P2 = 1$) ima isti spol ($P4$) kao supružnik ($P2 = 2$)

Bračni status pogreška je ako supružnik i nositelj kućanstva imaju na polju P15 šifru 1 ili 3

Udovac pogreška koja se pojavljuje ako je $P15 = 3$, a osoba je mlađa od 26 godina (starost se računa s $P14$)

Nositelj pogreška je ako je nositelj mlađi od 18 godina na $P14$

Nositelj – supružnik pogreška je ako je razlika u starosti među supružnicima veća od 15 god. ($P14$)

Nositelj – dijete pogreška je ako je nositelj stariji od djeteta manje od 16 god.

Supružnik – dijete pogreška je ako je supružnik stariji od djeteta manje od 16 god.

Nositelj – unuk pogreška je ako je nositelj stariji od unuka manje od 35 god.

Supružnik – unuk pogreška je ako je supružnik stariji od unuka manje od 35 god.

Nositelj ili supružnik – otac/majka ($P2 = 5$) pogreška je ako su roditelji stariji manje od 16 god.

CONSISTENCY CONTROL

For each household (form 2012 LFS) count:

- number of surveyed persons ($P\ 103 > 0$)
- number of household heads ($P\ 2 = 1$)
- number of spouses ($P\ 2 = 2$ & $P3a$)

The number of persons must be equal to field A14 (if not – error)

The head of each household must be one and only one head of household

A spouse in each household can have not more than one spouse, but only at P2

For each period, there is a reference date, which is entered into a particular file. Persons that have prior to the reference date reached 15 years of age are interviewed (if $P14$ = reference date – person who is exactly 15 years of age)

Older than 15 error that appears if $P13 < P14 \leq$ reference date, whereas $P15 < 1$

Younger than 15 error that appears if $P13 < 1$ and $P14 >$ reference date, whereas $P15 > 0$

The following verifications are carried out if persons are continually present in the household ($P12$).

Sex error if the head ($P2=1$) is the same sex ($P4$) as the spouse ($P2 = 2$)

Marital status error if the spouse and head of household have the same field P15 code 1 or 3

Widower error that appears if $P15 = 3$, and the person is younger than 26 years of age (age is calculated with $P14$)

Head error if the head is younger than 18 years of age at $P14$

Head-spouse error if the difference in age between the spouses is greater than 15 years ($P14$)

Head-child error if the head is older than the child by at least 16 years

Spouse-child error if the spouse is older than the child by at least 16 years

Head-grandchild error if the head is older than the grandchild by at least 35 years

Spouse-grandchild error is the spouse is older than the grandchild by at least 35 years

Head or spouse – father/mother ($P2 = 5$) error if the parents are older by at least 16 years

DODATAK KONTROLI

Ime i prezime ne smije biti broj, također više od dva slova na svakom polju
Ako je 3b i/ili 3c > 0, **onda na Q2 mod 1 i mod 2** ≠ redni broj na 3b i/ili 3c

Q2	3a	3b	3c	
1	2	4	3	Na rednim su brojevima roditelji nositelja
2	1	4 (pogrešno)	3 (pogrešno)	
5	4			
5	3			

Q2	3a	3b	3c	Q4
1				2
3	3		1	1
4	4 (pogrešno) treba biti 2			2
7		2	3	1

ADDITIONAL CONTROLS

Name and surname cannot be a number, also more than two letters in each field
If 3b and/or 3c > 0, **then at Q2 mod 1 & mod 2** ≠ sequential number at 3b and/or 3c

Q2	3a	3b	3c	
1	2	4	3	The parents of the heads are at the sequential numbers
2	1	4 (error)	3 (error)	
5	4			
5	3			

Q2	3a	3b	3c	Q4
1				2
3	3		1	1
4	4 (error) should be 2			2
7		2	3	1

ARS 2012.

Anketa o radnoj snazi

Vrsta posla: 2 5 8 1 Panel: Tjedan: Godina: 2 0 1 2

A1 ŠIFRA ŽUPANIJE:

A2 ŠIFRA SEGMENTA:

A3 REDNI BROJ POPISNOGA KRUGA:

A4 REDNI BROJ STANA:

A5 BROJ KUĆANSTAVA U STANU:

A6 REDNI BROJ KUĆANSTVA:

1. ŽUPANIJA		
2. NASELJE		Novo stanje: ▼
3. ULICA I BROJ		
4. IME I PREZIME NOSITELJA		

A7 Broj dolazaka (upišite broj dolazaka):

Broj dolaska	1.	2.	3.	4.	5.
Datum dolaska (dd/mm):					
Vrijeme dolaska (h/min):					

A8 Razina urbanizacije:

- 1 - Gradsko naselje 2 - Prigradsko naselje
3 - Seosko naselje 4 - Kuća izvan naselja

PODACI O STAMBENOJ JEDINICI

A9 Nalazi li se na naznačenoj adresi izabrana stambena jedinica?

1 - DA

A10

- 2 - DA, ali stan se više ne upotrebljava za stanovanje (npr. poslovni prostor)
3 - DA, ali stan je prazan (dulje izbjivanje stanara, smrt jedinog stanara i sl.)
4 - Nije moguće pronaći stambenu jedinicu
5 - Stambena jedinica nije dostupna (zbog elementarnih nepogoda, epidemije i sl.)
6 - Stambena jedinica više ne postoji

**KRAJ
ANKETE**

A10 Jeste li stupili u kontakt sa stanarima?

1 - DA, i poznat je broj kućanstava

(upišite broj) _____

A12

2 - Stanari su odsutni, ali poznat je broj kućanstava koja žive u stanu (upišite broj) _____

3 - Stanari su odbili kontakt, ali poznat je broj kućanstava koja žive u stanu (upišite broj) _____

A11

4 - Nije moguće ustanoviti koliko kućanstava živi u stanu

**KRAJ
ANKETE**

A11 Broj osoba u kućanstvima?

Red. br. kućanstva	1.	KRAJ ANKETE
Broj osoba:		

PODACI O KUĆANSTVU

A12 Prihvaća li kućanstvo sudjelovanje u anketi?

1 - DA

A14

2 - Ne prihvaća

(upišite broj osoba u kućanstvu) _____

A13

3 - Kućanstvo je odsutno (kada je u stambenoj jedinici nekoliko kućanstava, jedno može biti odsutno) (upišite broj osoba u kućanstvu) _____

**KRAJ
ANKETE**

A13 Označite najvažniji razlog zbog kojega kućanstvo ne sudjeluje u anketi:

- 1 - Nedostatak vremena
- 2 - Negativna iskustva s anketama
- 3 - Nezainteresiranost za intervju
- 4 - Nemogućnost sudjelovanja (npr. bolest, starost)

5 - Ostali razlozi odbijanja (upišite razlog): _____

**KRAJ
ANKETE**

A14 Broj osoba u anketiranom kućanstvu: _____

A15 POČETAK ANKETIRANJA: _____

Vrijeme: sat _____ min _____

A16 Stambeni status kućanstva: _____

- 1 - Vlasnik stana/kuće
- 2 - Nositelj stanarskog prava
- 3 - Podstanar u cijelom stanu
- 4 - Podstanar u dijelu stana
- 5 - Srodnik s vlasnikom/nositeljem stanarskog prava
- 6 - Ostalo

ISPUNJAVA SE NAKON ZAVRŠETKA ANKETE!

A17 Je li kućanstvo spremno davati podatke telefonom?

- 1 - **DA**, upišite broj telefona: _____ / _____
- 2 - **NE**
- 3 - **Nema telefon**

A18 Ocjena o spremnosti ispitanika u davanju odgovora:

- 1 - Vrlo dobra
- 2 - Dobra
- 3 - Slaba

A19 ZAVRŠETAK ANKETIRANJA: _____

Vrijeme: sat _____ min _____

PODACI ZA PROVJERU RADA:

A20 ANKETAR: _____

A21 KONTROLOR: _____

A22 ŠIFRANT: _____

A23 UNOS: _____

ANKETAROVE NAPOMENE: _____
