NOTES ON METHODOLOGY

Sources and methods of data collection

Presented data on construction are collected through reporting method on forms entitled the Monthly Report on Construction and the Quarterly Report on Construction (GRAD-21/M and GRAD-21/3M forms).

Coverage and comparability

The monthly and quarterly reports on construction are collected from business entities (legal entities and tradesmen) and parts thereof employing 20 or more persons classified according to the NKD 2007 (NN, No. 58/07) into section F Construction in the Statistical Business Register.

Data refer to all construction works (new constructions and reconstructions, maintenance and repair works on existing constructions) done on the territory of the Republic of Croatia.

Constructions and works are classified according to the Classification of Types of Constructions – KVG.

Definitions

The value of construction works is presented in current prices and includes works actually done during the reporting period, irrespective of whether they are paid for or not.

The value of construction works done includes the value of work, building material, complete units and structures, propulsion material and electricity, expenses of construction machinery usage and equipment and other expenses related to the work in question.

The value of construction works done excludes value added tax, purchase costs of the land, project costs, surveying of land and supervising of services.

The value of new orders is the total value of the contracts made in a reference month with ordering parties. An order is considered to be made on the day when a contract is signed between the ordering party and the contractor.

New orders also include works done by a constructor on own account and for sale (e.g. business premises and dwellings). Referring to constructions on own account and for sale, it is assumed that the order is placed on the day when works have actually started and that the presumed value of works is included.

More detailed notes on methodology of these surveys are published on the web site of the [Croatian Bureau of Statistics](#).
