TRAFFIC IN AIRPORTS, JUNE 2023

The total traffic of passengers in Croatian airports amounted to 1 479 thousand in June 2023, which was 15.4% more than in June 2022, when the total traffic of passengers amounted to 1 282 thousand.

The largest traffic of passengers was recorded in the Split Airport, with 484 thousand passengers, which was an increase of 15.8% compared to June 2022, when the traffic of passengers amounted to 418 thousand. The Zagreb Airport followed, with 345 thousand passengers, which was an increase of 18.5% compared to June 2022, when the traffic of passengers amounted to 291 thousand, and the Dubrovnik Airport, with 343 thousand passengers, which was an increase of 10.2% compared to June 2022, when the traffic of passengers amounted to 311 thousand.

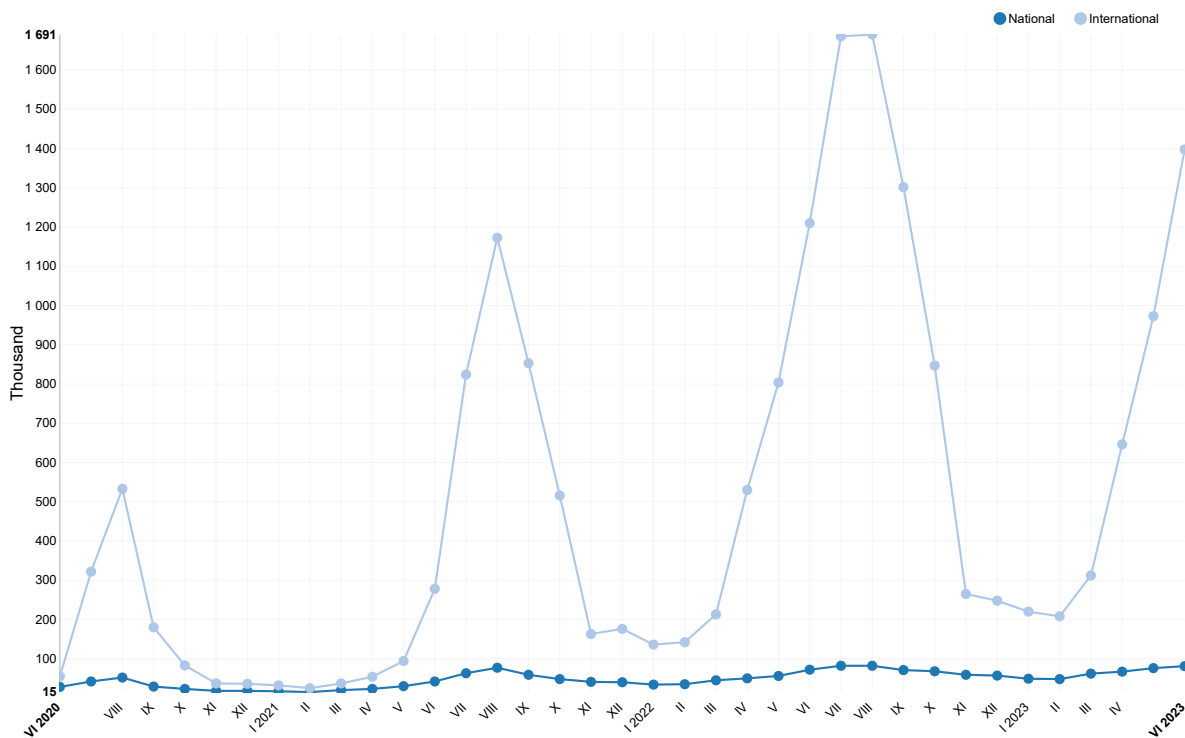

The most significant international traffic of passengers was realised with German airports, 294 thousand passengers, which was 13.7% more than in June 2022. The airports of the United Kingdom followed, with 275 thousand passengers, which was 11.0% more than in the same period of the previous year, and the airports of France, with 102 thousand passengers, which was 7.3% more than in the same period of the previous year.

The total number of landings and take-offs in airports in June 2023 amounted to 15 164 movements, which was 1.0% more than in June 2022, when the total number of landings and take-offs in airports amounted to 15 011 movements.

The total traffic of freight in airports in June 2023 amounted to 887 tonnes, which was a decrease of 11.4% compared to June 2022, when the total traffic of freight in airports amounted to 1 001 tonnes.

In the first half-year of 2023, compared to the same period of 2022, the total number of landings and take-offs in airports increased by 6.9%, the total traffic of passengers by 24.4%, whereas the total traffic of freight decreased by 3.9%.

NOTES ON METHODOLOGY

Sources and methods of data collection

Cumulative data are not always equal to the sum of individual monthly results due to the rounding of numbers to the nearest thousand.

The purpose of the survey is to collect data on the number of all aircraft movements and the traffic of passengers and freight on commercial operations in airports and air landing places of the Republic of Croatia.

The observation units and reporting units are airports in the Republic of Croatia. Data are collected in the form of electronic datasets and on the PZ/M-21 form.

Coverage

The data on air traffic (total aircraft movements, traffic of passengers and freight in airports) relate to the activities of the airports of Zagreb, Split, Dubrovnik, Pula, Rijeka, Zadar, Osijek, Brač and the air landing place of Mali Lošinj.

The number of total aircraft movements in airports refers to the number of all (commercial and non-commercial) operations of landing and taking-off of an aircraft, except state flights (military, customs, police).

Traffic of passengers in airports includes the number of passengers who have departed or arrived on commercial operations. Passengers in direct transit are excluded. Direct transit passengers are passengers who, after a short stop, continue their journey on the same aircraft on a flight having the same flight number as the flight on which they arrived.

Traffic of freight in airports refers to the loaded and unloaded goods and mail on commercial operations other than the baggage of passengers. The freight in direct transit is excluded.
